User Module							
Precondition: The user (the person who registers, logs in and uses the application) has a registered, verified account (or one created by the Admin), is logged in to the meal service application, and the meals and menu have already been set up by the Admin. The account is registered either For Myself (the user is also the meal recipient, the person who will receive the meals) or for a Family Member (the user manages the account for another person, the meal recipient).							
Postcondition: The user's profile, the meal recipient's profile, or the order is saved with a unique reference, the order status and notifications are updated, and the action is logged under the user's account with the user who made it and the meal recipient it concerns. Notifications go to the user; the health, dietary, and delivery information belongs to the meal recipient.							
No.	**Epic (System Component)**	**Persona (User)**	**I want to (action)**	**So that (benefit or value)**	**Scenarios (Given / When / Then)**	**Acceptance Criteria (System Requirement)**	**Remarks**
USR - 01	Authentication & Account Management	As a User	sign up either for myself or for a family member, then create an account using my first name, last name, contact number, address, email and password	so that I can access the meal service, and the meals and health information are saved for the right person (myself or the family member who will receive the meals).	Given When Then	1. The system shall first display the "Who is this meal subscription for?" screen with the options "Signing Up for Myself" and "Signing Up for a Family Member" before the sign-up form (USR - 43).	
					A. Choose who is signing up **Given** the user opens the app and selects Sign Up **When** the sign-up screen opens **Then** the system shall first display "Who is this meal subscription for?" with two options, "Signing Up for Myself" and "Signing Up for a Family Member" (USR - 43), before any form is shown **Sample Data:** Maria Santos chooses "Signing Up for Myself". Carlos Dizon chooses "Signing Up for a Family Member".	2. The system shall collect the user's first name and last name as separate fields (not one full name), contact number, email address and password. The delivery address is collected from the user for "Signing Up for Myself"; for "Signing Up for a Family Member" it is collected for the family member who will receive the meals (USR - 44).	
					B. Sign up for myself **Given** the user has chosen "Signing Up for Myself" and has not registered before **When** the user enters the first name, last name, contact number, complete address, email address and password, accepts the Terms and Conditions and selects Sign Up **Then** the system shall create my account, treat me as the person who will receive the meals, and open the profile form for my allergies and dietary restrictions **Sample Data:** Maria / Santos / 09171234567 / 12 Mabini St., Quezon City / maria.santos@gmail.com / Meal@2026, Terms and Conditions ticked.	3. The system shall require a password and shall not create an account without one.	

C. Sign up for a family member **Given** the user has chosen "Signing Up for a Family Member" and has not registered before **When** the user enters their own first name, last name, contact number, email address and password, accepts the Terms and Conditions and selects Sign Up **Then** the system shall create the account for the user, and then ask for the details of the family member who will receive the meals (first name, last name, relationship, delivery address) (USR - 44), before opening the allergy and dietary restriction forms for that family member **Sample Data:** User: Carlos Dizon, 09175550123, carlos.dizon@gmail.com. Family member: Lia Dizon (Child), 8 Sampaguita St., Quezon City.	4. The system shall validate required fields, email format and contact number, and display a clear message when they are not valid.	
D. Missing or invalid details **Given** the user is on the sign-up form **When** a required field (including the password) is missing, or the email/contact number is invalid **Then** the system shall show a clear validation message and shall not create the account **When** no option was chosen on the "Who is this meal subscription for?" screen and Continue is selected **Then** the system shall ask the user to choose one and shall not open the form	5. The system shall require acceptance of the Terms and Conditions.	
E. Order of the sign-up steps **Given** the account has been created **When** the user continues **Then** the system shall ask, in this order: (1) the personal details, (2) the food allergies of the meal recipient (USR - 11), (3) the health condition (HTN, Diabetes, Gout, Kidney Problem, Low-Cholesterol Diet) or the restriction given by the doctor (USR - 09), and then show the recommended foods (USR - 35) **Sample Data:** Peanuts; Diabetes; doctor note "Soft food texture".	6. The system shall securely hash passwords and never store them as readable text.	

						7. After the account is created, the system shall ask for the food allergies (USR - 11), then the health condition or the doctor-provided restriction (USR - 09), and then show the recommended foods based on them (USR - 35). For a family member, these are recorded for the family member who will receive the meals.	
						8. The system shall store the choice (For Myself or Family Member) with the account and show it in the profile (USR - 07).

USR - 02	Authentication & Account Management	As a User	log in using my registered username and password	so that only I, or someone I authorize, can view my orders and health information.	Given When Then	1. The system shall require a username and a password before granting access.	
					A. Successful login **Given** the user has a verified, active account and is on the login screen **When** the user enters the registered username and password and selects Log in **Then** the system shall grant access, redirect the user to the meal menu and record the date and time of the login **Sample Data:** Username: msantos. Password: Meal@2026.	2. The system shall display "Invalid username or password." when the credentials do not match an active account.	
					B. Invalid or blank credentials **Given** the user is on the login screen **When** the username or password does not match an active account **Then** the system shall display "Invalid username or password." **When** the username or password is left blank **Then** the system shall not grant access **Sample Data:** Invalid: msantos / wrongpass. Blank username or password.	3. The system shall lock the account after five consecutive failed login attempts.	

C. Account lockout **Given** the user has entered a wrong password for msantos four times in a row **When** the fifth wrong password is entered **Then** the system shall lock the account **When** the user then enters the correct password **Then** the system shall display "Your account is locked. Please reset your password or contact support." and keep the account locked **When** the user resets the password (USR - 04 and USR - 05) **Then** the system shall allow the user to log in again **Sample Data:** Wrong password: wrongpass, 5 times in a row. Correct password after the lockout: Meal@2026.	4. The system shall redirect the user to the meal menu after a successful login.	
D. Unverified account **Given** the user has registered but not yet verified the account **When** the user enters the correct username and password **Then** the system shall display "Please verify your account first." and open the "Verify your account" screen (USR - 33)	5. The system shall record the date and time of every login and logout.	
E. Too many attempts **Given** one phone is used to try different usernames **When** wrong passwords are entered for 11 different usernames within one minute **Then** the system shall display "Too many attempts. Please wait a minute and try again." and not count the blocked attempts towards the five-attempt lockout **Sample Data:** 11 different usernames within one minute from the same phone.	6. The system shall display "Your account is locked. Please reset your password or contact support." when a locked account is used to log in, and shall keep the account locked until the user resets the password or the Admin unlocks it.	
	7. The system shall apply the password rules and the five-attempt lockout to username and password accounts only. Accounts that continue with Google are not locked by failed password attempts (see USR - 30).	

						8. The system shall display "Please verify your account first." and open the "Verify your account" screen (USR - 33) when the correct username and password belong to an account that is not yet verified.	
						9. The system shall allow no more than 10 login attempts per minute from the same device or network address, whatever the username, and display "Too many attempts. Please wait a minute and try again." Attempts blocked this way do not count towards the five-attempt lockout.

USR - 03	Authentication & Account Management	As a User	choose to stay logged in on my device	so that I do not have to sign in every time I open the app.	Given When Then	1. The system shall display a "Keep me logged in" option on the login screen.	
					A. Stay logged in **Given** the user is on the login screen **When** the user ticks "Keep me logged in", logs in and then closes and reopens the app **Then** the system shall keep the session active until the user logs out **When** the user logs in with the option unticked and then closes and reopens the app **Then** the system shall show the login screen **Sample Data:** Username: msantos. Option ticked, then unticked.	2. The system shall keep the session active on the device until the user logs out when the option is selected.	
					B. Password changed **Given** the user is logged in on a device with "Keep me logged in" ticked **When** the password is changed **Then** the system shall require the user to log in again **Sample Data:** New password: NewMeal@2026.	3. The system shall end the session when the app is closed or after a period of inactivity when the option is not selected.	
						4. The system shall require the user to log in again after the password has been changed.

USR - 04	Authentication & Account Management	As a User	request help when I forget my password	so that I can regain access to my account without asking staff to do it for me.	Given When Then	1. The system shall allow a password reset to be requested with the registered contact number or the registered email address, and the user shall choose "Send code by SMS" or "Send code by email".	
					A. Request a verification code **Given** the user is on the forgot password screen **When** the user enters a registered contact number and chooses "Send code by SMS" **Then** the system shall send a 6-digit code by SMS **When** the user enters a registered email address and chooses "Send code by email" **Then** the system shall send a 6-digit code by email **Sample Data:** Registered number: 09171234567, by SMS. Registered email: maria.santos@gmail.com, by email.	2. The system shall display "No account found with this contact number." or "No account found with this email address." when the value is not registered.	
					B. Unregistered contact details **Given** the user is on the forgot password screen **When** the contact number or email address is not registered **Then** the system shall display "No account found with this contact number." or "No account found with this email address." **Sample Data:** Unregistered number: 09999999999. Unregistered email: unknown@example.com.	3. The system shall send the 6-digit verification code by SMS or by email as chosen, and apply the code rules and messages in USR - 33 (10-minute expiry, resend, five incorrect entries).	
					C. Enter the code **Given** a code has been sent to the user **When** the user enters the correct code within 10 minutes **Then** the system shall open the new password screen (USR - 05) **When** the code is wrong, expired, entered wrongly five times, or resent **Then** the system shall apply the code rules and messages in USR - 33 **Sample Data:** Test environment code: 123456.	4. The system shall allow the user to proceed to the new password screen only after the correct, unexpired code is entered.	

					D. Google-only account **Given** an account signs in only with Google and has no password **When** the user enters its contact number or email address **Then** the system shall display "This account signs in with Google. Please use that option to log in." and not send a code **Sample Data:** Google-only contact number: 09175550142.	5. The system shall display "This account signs in with Google. Please use that option to log in." when the account has no password, and shall not send a code.

USR - 05	Authentication & Account Management	As a User	set a new password after verifying my identity	so that my account stays secure and I can log in again.	Given When Then	1. The system shall allow a new password to be set only after the verification code in USR - 04 has been accepted, and shall require the new password to be entered twice.	
					A. Set a new password **Given** the user has entered the correct verification code (USR - 04) **When** the user enters the new password twice and saves **Then** the system shall display "Password updated. Please log in." **When** the user was also logged in on another device **Then** the system shall end that other session **Sample Data:** New password: NewMeal@2026, entered twice. Two devices logged in; reset done on one.	2. The system shall display "Passwords do not match." when the two entries are different.	
					B. Invalid new password **Given** the user is on the new password screen **When** the two entries are different **Then** the system shall display "Passwords do not match." **When** the password has fewer than 8 characters **Then** the system shall display "Password must be at least 8 characters." **When** the password is the same as the current password **Then** the system shall not accept it **Sample Data:** Mismatch: NewMeal@2026 and NewMeal@2027. Short password: Abc123. Same as current: Meal@2026.	3. The system shall display "Password must be at least 8 characters." when a shorter password is entered.	

					C. No verified code **Given** the user has not entered a verified code **When** the user tries to open the new password screen **Then** the system shall refuse access and return the user to the forgot password screen	4. The system shall not accept a new password that is the same as the current password.	
						5. The system shall display "Password updated. Please log in." after a successful reset.	
						6. The system shall end all other active sessions of the account after the password is changed.

USR - 06	Authentication & Account Management	As a User	log out of my account	so that my information is not exposed when someone else uses the device.	Given When Then	1. The system shall provide a Log out option reachable from the main menu.	
					A. Log out with confirmation **Given** the user is logged in **When** the user chooses Log out from the main menu **Then** the system shall display "Are you sure you want to log out?" with Yes and No **When** the user chooses Yes **Then** the system shall end the session, show the login screen and record the date and time of the logout **Sample Data:** Logout timestamp in the log, e.g. 2026-10-12 09:15 AM.	2. The system shall display "Are you sure you want to log out?" before ending the session.	
					B. Cancel logging out **Given** the "Are you sure you want to log out?" message is displayed **When** the user chooses No **Then** the system shall keep the session active	3. The system shall end the session and return to the login screen after confirmation.	
						4. The system shall record the date and time of the logout.

USR - 07	User Profile & Dietary Information	As a User	view my profile, and the meal recipient's profile, in one screen	so that I can check that the personal, health, and dietary information of the user and of the meal recipient is correct before ordering.	Given When Then	1. The system shall display "Registered for: Myself" or "Registered for: Family Member" at the top of the profile (USR - 43).	
					A. View the profile (For Myself) **Given** the user msantos registered For Myself, is logged in and has completed the profile **When** the user opens Profile **Then** the system shall display "Registered for: Myself" and one set of details for the user, who is also the meal recipient: the personal details, the health conditions, dietary restrictions, food allergies and meal preferences, the guardian or family member, and the date the profile was last updated **Sample Data:** First name Maria, Last name Santos, 09171234567, maria.santos@gmail.com, 12 Mabini St., Quezon City. Hypertension, Low-sodium, Peanuts, guardian Jose Santos (Son), last updated 2026-10-11.	2. The system shall display the user's first name, last name (with middle name and suffix, if any), contact number, and email address.	
					B. View the profile (Family Member) **Given** the user cdizon registered as Family Member, is logged in and has saved the meal recipient's details **When** the user opens Profile **Then** the system shall display "Registered for: Family Member" and two separate sections: "Your details" (the user's name, contact number and email address) and "Meal recipient" (the name, relationship to the user, contact number if any, and delivery address of the person receiving the meals), followed by the meal recipient's health conditions, dietary restrictions, food allergies and meal preferences, the family contact, and the date the profile was last updated **Sample Data:** Your details: Carlos Dizon, 09175550123, carlos.dizon@gmail.com. Meal recipient: Lia Dizon (Child), 8 Sampaguita St., Quezon City. Diabetes, Low-sugar, Peanuts, family contact Carlos Dizon, last updated 2026-10-20.	3. The system shall display the address as part of the same person's details for a For Myself account, because the user is also the meal recipient.	
						4. The system shall display the user's details ("Your details") and the meal recipient's details ("Meal recipient": name, relationship to the user, contact number if any, and delivery address) in two separate sections for a Family Member account.	

						5. The system shall display the meal recipient's recorded health conditions, dietary restrictions, food allergies, and meal preferences, labeled with the meal recipient's name (USR - 46).	
						6. The system shall display the guardian/family member information, if any (USR - 14).	
						7. The system shall display the date the profile was last updated.

USR - 08	User Profile & Dietary Information	As a User	edit my own personal information	so that my contact details, and my delivery details when I registered For Myself, are always current.	Given When Then	1. The system shall allow the user's first name, last name, middle name, suffix, contact number, and email address to be edited, and the address as well when the account is registered For Myself.	
					A. Edit personal information **Given** the user is on the Edit profile screen **When** the user changes the address or name and saves **Then** the system shall save the change and display "Profile updated successfully." **Given** the user registered as Family Member **When** the user changes the name or contact number and saves **Then** the system shall change only the user's details and leave the meal recipient's details as they are **Sample Data:** Address: 45 Rizal Ave., Quezon City. Name: First name Maria Luisa, Last name Santos. Family Member: Carlos Dizon changes the contact number to 09175550999. Lia Dizon's details do not change.	2. The system shall display "Please enter a valid contact number." or "Please enter a valid email address." when the value is not valid.	

B. Blank or invalid entries **Given** the user is on the Edit profile screen **When** the first name, last name or email is blank **Then** the system shall display "Please fill in all required fields." **When** the contact number or email address is not valid **Then** the system shall display "Please enter a valid contact number." or "Please enter a valid email address." **Sample Data:** Invalid contact numbers: 0917123 and 0917ABC4567. Invalid email: maria.santos@.	3. The system shall display "Please fill in all required fields." when the first name, last name, or email is blank.	
C. Change contact number or email **Given** the user is on the Edit profile screen **When** the user enters a new contact number or email address **Then** the system shall send a 6-digit code by SMS or email and save the new value only after the correct code is entered **When** a wrong code is entered **Then** the system shall show the message in USR - 33 and keep the old value **When** the new value belongs to another account **Then** the system shall display "This username or contact number is already registered." or "This email address is already registered." **Sample Data:** New number: 09181234567. New email: m.santos@gmail.com. Wrong code: 000000.	4. The system shall send a 6-digit verification code by SMS to a new contact number, or by email to a new email address, and save the new value only after the correct code is entered, using the code rules and messages in USR - 33.	
D. Leave with unsaved changes **Given** the user has edited a field without saving **When** the user presses Back **Then** the system shall ask for confirmation before leaving the screen	5. The system shall display "This username or contact number is already registered." or "This email address is already registered." when the new value belongs to another account.	
	6. The system shall display "Profile updated successfully." after the changes are saved.	
	7. The system shall ask for confirmation before leaving the screen with unsaved changes.	

						8. The system shall apply this story to the user's own details only. The meal recipient's details of a Family Member account, including the delivery address, are edited in USR - 45.

USR - 09	User Profile & Dietary Information	As a User	select my health condition or enter a dietary restriction given by my doctor	so that the system can recommend meals that follow my health needs and medical instructions.	Given When Then	1. The system shall provide condition options for HTN, Diabetes, Gout, Kidney Problem and Low-Cholesterol Diet.	
					A. Select health conditions **Given** I am completing or editing the dietary information form **When** I select one or more applicable conditions, such as Hypertension (HTN), Diabetes, Gout, Kidney Problem or Low-Cholesterol Diet **Then** the system shall save the selected conditions to my profile.	2. The system shall provide an “Other / Doctor-provided restriction” option with a text field.	
					B. Doctor-provided restriction **Given** I am completing or editing the dietary information form **When** my doctor has given me a specific dietary restriction **Then** I can select the doctor-provided restriction option and enter the instruction in the text field for Dietitian review.	3. The system shall make the saved information available to the Dietitian and use it when filtering meal recommendations.

USR - 11	User Profile & Dietary Information	As a User	record my food allergies	so that meals containing ingredients I am allergic to are excluded from my recommendations.	Given When Then	1. The system shall allow users to select or enter food allergies.	
					A. Save food allergies **Given** the allergy section is open **When** I select or enter my food allergies and save the form **Then** the system shall store the allergies and exclude meals containing those allergens from recommended foods.	2. The system shall check meal ingredients and allergen information before showing a recommendation.	
					B. No safe meal available **Given** the allergy section is open **When** no safe recommended meal is available **Then** the system shall show a message instead of suggesting an unsafe meal.	3. The system shall not recommend meals that contain a recorded allergen.	
						Passed

						Total	
USR - 12	User Profile & Dietary Information	As a User	add the meal recipient's meal preferences	so that the menu can suggest meals the meal recipient is more likely to enjoy.	Given When Then	1. The system shall allow preferred meal categories and disliked ingredients to be recorded.	
					A. Add meal preferences **Given** the user is on the meal preferences screen of the meal recipient **When** the user records preferred categories and disliked ingredients and saves **Then** the system shall save them and display "Meal preferences saved." **Sample Data:** Preferred categories: Soup, Fish. Disliked ingredients: Ampalaya, Liver.	2. The system shall allow the preferences to be updated or removed.	
					B. Update or remove a preference **Given** the user has saved meal preferences **When** the user removes a disliked ingredient and saves **Then** the system shall remove it **Sample Data:** Remove Liver.	3. The system shall use the preferences to sort matching meals first in the menu.	

					C. Menu ranking **Given** the meal recipient prefers Soup and Fish, dislikes Ampalaya, has the Low-sodium restriction and is allergic to Peanuts **When** the user opens the menu **Then** the system shall list meals by score, highest first, with meals that contain a recorded allergen listed last and shown with a warning **Sample Data:** Chicken Tinola (score 5), Grilled Bangus (5), other meals (0), Ampalaya Stir-fry (-3), Chicken Satay (last).	4. The system shall display "Meal preferences saved." after a successful save.	
						5. The system shall rank the menu by a score and list the highest score first, with equal scores in alphabetical order: - +3 when the meal is in a preferred category - +2 when the meal matches a dietary restriction in the meal recipient's profile (e.g., Low-sodium) - +1 when the meal matches a nutritional preference (USR - 13) - -3 for each disliked ingredient in the meal - Meals that contain a recorded allergen are listed last, with a warning, and never given a bonus	
						6. The system shall record the preferences for the meal recipient, not for the user, and shall rank the menu using the meal recipient's preferences, restrictions, and allergies.	
						Passed

USR - 13	User Profile & Dietary Information	As a User	update the meal recipient's nutritional preferences	so that I can pick meals that fit the meal recipient's daily nutrition goals.	Given When Then	1. The system shall allow nutritional preferences to be selected (e.g., lower calories, higher protein, lower sodium).	
					A. Select nutritional preferences **Given** the user is on the nutritional preferences screen of the meal recipient **When** the user selects preferences and saves **Then** the system shall save them and display "Nutritional preferences updated." **Sample Data:** Lower sodium and Higher protein selected. Family Member: Lower calories selected for Lia Dizon.	2. The system shall allow the selected preferences to be changed at any time.	

					B. Change preferences **Given** the meal recipient has saved nutritional preferences **When** the user changes them **Then** the system shall save the new selection **Sample Data:** Change to Lower calories only.	3. The system shall allow the meal list to be filtered using the saved nutritional preferences.	
					C. Filter the menu **Given** the meal recipient has saved nutritional preferences **When** the user applies the filter in the menu **Then** the system shall show only matching meals	4. The system shall display "Nutritional preferences updated." after a successful save.	
						5. The system shall save the nutritional preferences for the meal recipient, not for the user.

USR - 14	User Profile & Dietary Information	As a User	add a guardian or family contact for the meal recipient	so that someone the meal recipient trusts can be contacted about the meal recipient's orders when needed.	Given When Then	1. The system shall allow a guardian/family member to be added with name, relationship, and contact number.	
					A. Add a guardian **Given** the user is on the guardian screen **When** the user enters the name, relationship and contact number and saves **Then** the system shall save them and display "Guardian information saved." **Sample Data:** Jose Santos / Son / 09189876543.	2. The system shall display "Please enter the guardian's name and contact number." when a required field is blank.	
					B. Blank required field **Given** the user is adding a guardian **When** the name or contact number is left blank **Then** the system shall display "Please enter the guardian's name and contact number." **Sample Data:** Blank contact number.	3. The system shall allow the guardian/family member information to be updated or removed.	

C. No guardian yet **Given** the user has not saved a guardian **When** the user opens the guardian screen **Then** the system shall display "No guardian or family member added yet." and an "Add guardian" button	4. The system shall display "Guardian information saved." after a successful save.	
D. Edit a guardian **Given** the user has a saved guardian **When** the user opens Edit guardian **Then** the system shall show the form filled in with the saved details **When** the user changes the number and saves **Then** the system shall save the change and display "Guardian information saved." **Sample Data:** Number changed from 09189876543 to 09189876500.	5. The system shall make the guardian information viewable to the Admin.	
E. Remove a guardian **Given** the user has a saved guardian **When** the user chooses Remove **Then** the system shall display "Are you sure you want to remove this guardian?" with Yes and No **When** the user chooses Yes **Then** the system shall remove the entry **When** the user chooses No **Then** the system shall keep the entry	6. The system shall display "No guardian or family member added yet." and an "Add guardian" button when no guardian has been saved.	
F. Admin view **Given** a guardian has been saved **When** the Admin opens the user record **Then** the system shall show the guardian information	7. The system shall open an Edit guardian form filled in with the saved name, relationship, and contact number, and shall apply the same required-field check as in no. 2.	

					G. Family Member accounts **Given** the user registered as Family Member **When** the user opens the guardian screen **Then** the system shall show the user's name and contact number as the main family contact of the meal recipient without requiring a guardian to be added, and shall still allow another guardian or family contact to be added **Sample Data:** Main family contact for Lia Dizon: Carlos Dizon, 09175550123 (the user). Another contact added: Rosa Dizon / Grandmother / 09175550456.	8. The system shall display "Are you sure you want to remove this guardian?" with Yes and No options before a guardian is removed.	
						9. The system shall show the user as the main family contact of the meal recipient for a Family Member account, using the name and contact number of the user's account, shall not require another guardian to be added, and shall allow another guardian or family contact to be added.

USR - 15	User Profile & Dietary Information	As a User	view the Terms and Conditions	so that I understand how my information will be used before I agree.	Given When Then	1. The system shall display the Terms and Conditions during registration and from the profile screen.	
					A. View the Terms and Conditions **Given** the user is on the registration page or Profile **When** the user opens the Terms and Conditions **Then** the system shall display them, including how health and dietary information is collected and used **Sample Data:** Opened from the registration page and from Profile.	2. The system shall display "You must accept the Terms and Conditions to continue." when registration is attempted without acceptance.	
					B. Registration without acceptance **Given** the user is on the registration page with the box unticked **When** the user selects Register **Then** the system shall display "You must accept the Terms and Conditions to continue."	3. The system shall record the date and time the Terms and Conditions were accepted.	

					C. Accept the Terms and Conditions **Given** the user ticks the box **When** the user registers **Then** the system shall record the date and time of acceptance **Sample Data:** Acceptance timestamp, e.g. 2026-10-12 09:00 AM.	4. The system shall state how health and dietary information is collected and used.	
					D. Family Member statement **Given** the user registered as Family Member **When** the user opens the Terms and Conditions **Then** the system shall display the statement that a user who registers for a family member must be allowed to manage that person's meals and health information **Sample Data:** Carlos Dizon reads the statement before saving Lia Dizon's details (USR - 44).	5. The system shall state in the Terms and Conditions that a user who registers for a family member must be allowed to manage that person's meals and health information, and shall record the user's confirmation (USR - 44).

USR - 16	Meals & Ordering	As a User	browse the available meals by meal time and food category	so that I can choose from the foods currently offered for breakfast, lunch or dinner.	Given When Then	1. The system shall separate the menu into Breakfast, Lunch and Dinner.	Connected to Admin menu management (ADM - 17 to ADM - 18).
					A. Browse meals by meal time **Given** I am signed in and open the Meals or Order page **When** I select Breakfast, Lunch or Dinner **Then** the system shall show the items available for that meal time. Breakfast shall show the pastries and breads currently available. Lunch and Dinner shall show the available meat choices (Beef, Pork, Chicken or Fish) and vegetable choices.	2. Breakfast shall display only available pastries and breads.	
						3. Lunch and Dinner shall display available meat or vegetable options.	
						4. The system shall show availability and current price for each item.	
						5. Meal availability and menu options shall use the menu items and availability maintained by Admin (ADM - 17 and ADM - 18).

USR - 18	Meals & Ordering	As a User	choose one meal for each meal time and customize my food choice	so that I can select meals that match my preferences while following my dietary needs.	Given When Then	1. The system shall allow one meal per meal time: Breakfast, Lunch and Dinner.	
					A. One meal per meal time **Given** I am on the Order page **When** I select one available meal for Breakfast, Lunch or Dinner **Then** the system shall allow only one meal selection for that meal time and a maximum of three meals per day.	2. The system shall limit selections to three meals per day.	
					B. Customize vegetables or meat **Given** I am on the Order page **When** I choose vegetables or meat for a meal **Then** for vegetables I can select steamed, stir-fried or pinakbet. For meat I can select Beef, Pork, Chicken or Fish and a Filipino cooking style such as Adobo, Tinola, Sinigang, Kaldereta or Pinoy Steak, subject to availability and Dietitian approval.	3. Vegetable options shall include steamed, stir-fried and Pinakbet.	
						4. Meat options shall include Beef, Pork, Chicken and Fish.	
						5. Available Filipino cooking styles shall include Adobo, Tinola, Sinigang, Kaldereta and Pinoy Steak.	
						6. Customizations shall be checked against the user's allergies and restrictions.

USR - 20	Meals & Ordering	As a User	review my meal selections or plan, confirm my order and pay after Dietitian approval	so that I can verify the order and complete payment before the kitchen prepares my meals.	Given When Then	1. The system shall calculate the total based on selected meals or the selected plan.	Connected workflow: User → Dietitian (DIT - 15) → payment → Kitchen (KIT - 11 to KIT - 13) → Admin assignment (ADM - 12) → Delivery Staff (DEL - 15 to DEL - 17), or Ready for Pickup.
					A. Review the order summary **Given** I have selected meals for the day or a meal plan **When** I open the order summary **Then** the system shall show the selected meals, meal times, customizations, delivery or pickup details and total amount. A standard meal shall cost ₱300. The available plans shall be ₱4,999 weekly, ₱27,899 monthly and ₱327,999 yearly.	2. The system shall display ₱300 per standard meal and the weekly, monthly and yearly plan prices.	

					B. Dietitian review and payment **Given** I have confirmed my order **When** the order is submitted **Then** it shall be sent to the Dietitian for review. If approved, the system shall prompt me to pay. The order shall be sent to the Kitchen only after payment is confirmed.	3. The system shall require confirmation before submitting the order.	
						4. Confirmed orders shall be routed to the Dietitian for review.	
						5. Payment shall be requested only after Dietitian approval.	
						6. Only paid orders shall be forwarded to Kitchen Staff for preparation.	
						7. The confirmed order shall be sent to the Dietitian for review (DIT - 15). After approval and successful payment, it shall enter the Kitchen order queue (KIT - 11 to KIT - 13). For delivery orders, the Admin assigns Delivery Staff (ADM - 12), who update delivery progress (DEL - 15 to DEL - 17). Pickup orders are completed after the pickup handoff is confirmed.

USR - 25	Orders	As a User	receive updates about my order	so that I do not have to keep checking the app.	Given When Then	1. The system shall send a notification when an order is confirmed, when its status changes, and when it is cancelled or has an issue.	
					A. Order notifications **Given** the user has an order **When** the order is confirmed, changes status, or is cancelled **Then** the system shall send a notification shown with its date and time **When** the order belongs to a Family Member account **Then** the system shall send the notification to the user and name the meal recipient in it **Sample Data:** "Order TRK-2026-0002 is now Out for Delivery." (2026-10-12 11:45 AM). Family Member: "Order TRK-2026-0004 for Lia Dizon is now Out for Delivery." sent to Carlos Dizon.	2. The system shall display notifications in the app with the date and time.	
					B. Read notifications **Given** the user has unread notifications **When** the user opens one **Then** the system shall mark it as read and keep it in the list	3. The system shall mark unread notifications and keep read notifications viewable.	
					C. Admin announcements **Given** the Admin sends an announcement **When** the user opens notifications **Then** the system shall show the announcement in the same list **Sample Data:** "Kitchen closed on Oct 31".	4. The system shall show announcements sent by the Admin in the same list.	
						5. The system shall send order notifications to the user, and include the meal recipient's name in the notification for Family Member orders.

USR - 26	Help & Assistance	As a User	view help instructions	so that I can learn how to use the app without asking for technical help.	Given When Then	1. The system shall display help instructions in simple, step-by-step language.	

					A. Help reachable from every screen **Given** the user is on any screen **When** the user selects the Help button **Then** the system shall open the help instructions, including from the login and sign-up screens **Sample Data:** Help opened from the login, sign-up, Home, Menu, Profile, Order and Tracking screens.	2. The system shall make the help instructions reachable from every screen, including the login and sign-up screens, through a Help button with a text label.	
					B. Step-by-step instructions **Given** the user is on the Help screen **When** the user opens "How to place an order" **Then** the system shall show simple steps **Sample Data:** 1. Choose meals, 2. Set quantity, 3. Pick delivery or pickup, 4. Review, 5. Confirm.	3. The system shall use text of at least 16 px, including meal-card text, checkbox labels, and the header Help button, and clearly labeled buttons.	
					C. Readable text **Given** the user views the app **When** the text size is checked, including meal cards, the "Use my nutrition goals" checkbox label and the header Help button **Then** the system shall use text of at least 16 px and clearly labeled buttons **When** the phone text size is set to the largest **Then** the system shall follow the setting without hiding content	4. The system shall follow the phone's text size setting without hiding content.

USR - 27	Help & Assistance	As a User	view frequently asked questions	so that I can get quick answers to common concerns.	Given When Then	1. The system shall display the frequently asked questions grouped by topic (account, ordering, delivery, health information).	

A. Browse by topic **Given** the user is on the FAQ screen **When** the screen opens **Then** the system shall group the questions by topic **Sample Data:** Topics: Account, Ordering, Delivery, Health Information.	2. The system shall allow the questions to be searched by keyword.	
B. Search the FAQ **Given** the user is on the FAQ screen **When** the user searches "password" **Then** the system shall show the matching question **When** the user searches "zzzz" **Then** the system shall display "No answers found."	3. The system shall display "No answers found." when the search returns no result.	
C. Expand an answer **Given** the FAQ list is displayed **When** the user taps a question **Then** the system shall expand its full answer, and collapse it when tapped again **Sample Data:** "How do I reset my password?": Forgot password > verify identity > set a new password.	4. The system shall expand a question to show its full answer when it is tapped and collapse it when tapped again.	

					D. Fuzzy FAQ search **Given** the user is on the FAQ screen **When** the user searches "pasword" (a missing letter) **Then** the system shall show the matching question "How do I reset my password?" **When** the user searches "PASSWORD " (capital letters and an extra space) **Then** the system shall show the same question **When** the user searches "reset pasword" (two words, one misspelled) **Then** the system shall show the same question **When** the user searches "delivry" (a missing letter) **Then** the system shall show the questions about delivery **When** the user searches "p" (one character only) **Then** the system shall keep showing the full grouped list until at least 2 characters are typed	5. The system shall search the question and answer text while ignoring capital letters and extra spaces, and shall find words with small typing mistakes (one wrong, missing, extra or swapped letter for words of 3 to 5 letters, up to two for 6 or more). Exact matches shall be listed before spelling-corrected matches, and "No answers found." shall be shown when nothing is close enough.

USR - 30	Authentication & Account Management	As a User	continue with Google to sign up or log in	so that I can use my existing Google account instead of creating a new password.	Given When Then	1. The system shall display a "Continue with Google" button on the login screen and the registration screen, next to the username and password option.	

A. First-time Google user **Given** the user has no account and is on the login or registration screen **When** the user selects "Continue with Google" **Then** the system shall create the account without sending a code, because Google has confirmed the email, and open the profile screen (USR - 31) **When** no registration type has been chosen yet **Then** the system shall show the registration type screen first (USR - 43) **Sample Data:** maria.santos@gmail.com, not yet registered.	2. The system shall sign in the existing account when the Google account has been used before, and create a new user account when it has not, without creating a duplicate.	
B. Returning Google user **Given** the user has used Google before **When** the user selects "Continue with Google" **Then** the system shall sign in the same account without creating a duplicate, and open the meal menu if the profile is complete or the profile screen if it is not **Sample Data:** Returning user with a complete profile. Returning user who left before finishing the profile.	3. The system shall treat the email address confirmed by Google as verified and shall not send a code to it. A new Google user goes to complete the profile (USR - 31) before any order, and a returning user with a complete profile goes to the meal menu.	
C. Email already exists **Given** an account with the same email exists and is not linked to Google **When** the user continues with Google **Then** the system shall display "An account with this email already exists. Log in to link your Google account." and open the linking screen (USR - 34) **Sample Data:** maria.santos@gmail.com belongs to msantos.	4. The system shall not create a second account and shall display "An account with this email already exists. Log in to link your Google account." when the Google email belongs to an account that is not linked to Google, and then open the linking screen (USR - 34).	

D. Cancelled, refused or failed sign-in **Given** the Google window is open **When** the user closes or cancels it **Then** the system shall return to the previous screen and display "Sign in with Google was cancelled." **When** the user refuses to share the name or email **Then** the system shall display "Continue with Google needs your name and email address to create your account." and create nothing **When** there is no internet or Google is unavailable **Then** the system shall display "Unable to continue with Google. Please check your connection and try again."	5. The system shall return to the previous screen without creating or changing any account and display "Sign in with Google was cancelled." when the user closes or cancels the Google window.	
E. Inactive account **Given** the account linked to the Google account is inactive **When** the user continues with Google **Then** the system shall display "This account is inactive. Please contact support."	6. The system shall display "Continue with Google needs your name and email address to create your account." and create nothing when the user refuses to share the name or email.	
F. Several Google accounts **Given** the phone has two Google accounts **When** the user selects "Continue with Google" **Then** the system shall show the account picker and use the chosen account, treating each as a separate user account **Sample Data:** maria.santos@gmail.com and msantos.work@gmail.com.	7. The system shall display "Unable to continue with Google. Please check your connection and try again." when Google cannot be reached or returns an error.	
G. Stay logged in **Given** the user ticked "Keep me logged in" and logged in with Google **When** the user closes and reopens the app **Then** the system shall keep the user logged in and record the login and logout times	8. The system shall display "This account is inactive. Please contact support." when the linked account is inactive.	
	9. The system shall show the Google account picker when more than one Google account is on the device, and shall treat each Google account as a separate user account.	

						10. The system shall record the date and time of every login and logout, and shall apply the "Keep me logged in" option, as in USR - 02, USR - 03, and USR - 06.	
						11. The system shall ask for the registration type (For Myself or Family Member) before creating a new Google account when none has been chosen yet (USR - 43).	
						Passed	
						Failed	
						Total	
USR - 31	Authentication & Account Management	As a User	complete my profile after continuing with Google	so that the service can reach me about my orders and my account is complete before I order.	Given When Then	1. The system shall require the first name, last name, and contact number before the account can be used. The names and the email address are filled in from Google (the user can edit the names). A username and a password are not required.	
					A. Complete the profile **Given** the user has continued with Google and the names and verified email are filled in **When** the user enters a contact number, ticks the Terms and Conditions and saves **Then** the system shall make the account ready, send no code to the Google email, and open the meal menu **Sample Data:** Maria / Santos, maria.santos@gmail.com, contact 09171234567.	2. The system shall display "Please fill in all required fields." when a required field is left blank.	
					B. Blank or invalid entries **Given** the user is on the profile screen **When** a required field is left blank **Then** the system shall display "Please fill in all required fields." **When** the contact number is not 11 digits or contains letters **Then** the system shall display "Please enter a valid contact number." **Sample Data:** Contact numbers: 0917123 and 0917ABC4567.	3. The system shall display "Please enter a valid contact number." when the value is not 11 digits or contains letters.	

					C. Duplicate contact number **Given** another account already uses 09171234567 **When** the user enters that number **Then** the system shall display "This username or contact number is already registered." and not link the two accounts	4. The system shall not send a code to the Google email address, which Google has already confirmed.	
					D. Terms and Conditions **Given** the user leaves the box unticked **When** the user saves **Then** the system shall display "You must accept the Terms and Conditions to continue." **When** the box is ticked **Then** the system shall record the date and time of acceptance (USR - 15)	5. The system shall display "This username or contact number is already registered." when the contact number belongs to another account, and shall not link the two accounts.	
					E. Unfinished profile **Given** the user closed the app before finishing **When** the user signs in again **Then** the system shall show this screen again and not allow the meal menu or an order until the profile is complete	6. The system shall require the Terms and Conditions to be accepted, display "You must accept the Terms and Conditions to continue." otherwise, and record the date and time of acceptance (USR - 15).	
					F. Family Member **Given** the user continued with Google and chose Family Member **When** the profile screen opens **Then** the system shall also show the meal recipient's details form (USR - 44) and not make the account ready until both are saved **Sample Data:** Carlos Dizon continues with Google, enters 09175550123, then enters Lia Dizon's details.	7. The system shall return the user to this screen at each sign-in until the profile is complete, and shall not allow orders until then.	
						8. The system shall also require the meal recipient's details (USR - 44) before the account can be used when the registration type is Family Member.

USR - 32	Authentication & Account Management	As a User	use my username and password instead of Google	so that I can still use the app if I prefer not to use another account.	Given When Then	1. The system shall keep "Continue with Google" optional, so that registration (USR - 01) and login (USR - 02) with a username and password work fully when it is not selected.	
					A. Use the app without Google **Given** the user does not tap "Continue with Google" **When** the user registers or logs in with a username and password **Then** the system shall work fully as in USR - 01 and USR - 02 **Sample Data:** msantos / Meal@2026.	2. The system shall not link a username and password account with a Google account automatically. A Google account is linked only after the user logs in with that account's username and password (USR - 34).	
					B. Wrong password **Given** the user logs in with a username and password **When** the password is wrong **Then** the system shall display "Invalid username or password."	3. The system shall offer password reset (USR - 04 and USR - 05) for username and password accounts only.	
					C. Google later with the same email **Given** the user has a username and password account **When** the user later taps "Continue with Google" with the same email **Then** the system shall ask the user to log in to link the accounts (USR - 34) and not link them automatically **Sample Data:** maria.santos@gmail.com.	4. The system shall show the same menu, orders, and profile screens to every user, whichever sign-in method was used.	
					D. Forgot password **Given** the user has a username and password account **When** the user uses Forgot password **Then** the system shall send the code as in USR - 04 **Sample Data:** 09171234567.		
						Passed

USR - 33	Authentication & Account Management	As a User	verify my account with a code sent by SMS or email	so that the service knows my contact details are mine and my account is protected.	Given When Then	1. The system shall show a "Verify your account" screen after registration with two options, "Send code by SMS" (to the contact number) and "Send code by email" (to the email address), and shall hide part of the number or address (e.g., 0917*****67 and m*****s@gmail.com). The code shall always go to the user's own contact number or email address, never to the meal recipient's.	
					A. Choose how to receive the code **Given** the user has just registered **When** the "Verify your account" screen opens **Then** the system shall show "Send code by SMS" and "Send code by email" with the number and address partly hidden **When** the user chooses a method **Then** the system shall send a 6-digit code by that method **Sample Data:** 0917*****67 and m*****s@gmail.com. Test environment code: 123456. Email subject: "Your verification code".	2. The system shall send a 6-digit numeric verification code by the chosen channel. SMS text: "Your verification code is 123456. It expires in 10 minutes. Do not share this code." Email subject: "Your verification code"; email body: "Your verification code is 123456. It expires in 10 minutes. If you did not ask for this code, ignore this email."	
					B. Correct code **Given** a code has been sent **When** the user enters the correct code within 10 minutes **Then** the system shall display "Your account is verified." and open the profile screen	3. The system shall mark the account as verified only when the correct, unexpired code is entered, and display "Your account is verified."	

C. Wrong, expired or too many codes **Given** a code has been sent **When** the code is wrong **Then** the system shall display "Incorrect verification code." **When** the code is entered after 10 minutes **Then** the system shall display "The verification code has expired." **When** a wrong code is entered five times in a row **Then** the system shall display "Too many incorrect attempts. Please request a new code." **Sample Data:** Wrong code: 000000. Correct code entered after 11 minutes.	4. The system shall display "The verification code has expired." when the code is used after 10 minutes.	
D. Resend or switch method **Given** a code has been sent **When** the user taps "Resend code" **Then** the system shall send a new code and invalidate the earlier one **When** the user taps "Send code by email instead" after choosing SMS **Then** the system shall send a new code by email and stop the SMS code from working	5. The system shall display "Incorrect verification code." when a wrong code is entered.	
E. Code limits **Given** a code was accepted or replaced **When** the same code is entered again **Then** the system shall display "Incorrect verification code." **When** "Resend code" is tapped again after 10 seconds **Then** the system shall display "Please wait [n] seconds before requesting a new code." **When** a sixth code is requested within one hour **Then** the system shall display "Too many code requests. Please try again in an hour."	6. The system shall allow the code to be resent, and shall invalidate any previously sent code when a new one is issued.	

					F. Code cannot be sent **Given** the user has chosen a method **When** the SMS or email cannot be sent **Then** the system shall display "We could not send the code. Please try again or use the other method."	7. The system shall display "Too many incorrect attempts. Please request a new code." and require a new code after five consecutive incorrect entries.	
					G. Unverified login **Given** the user closed the app before verifying **When** the user logs in **Then** the system shall display "Please verify your account first." (USR - 02) and not allow orders	8. The system shall not allow an unverified account to log in (USR - 02), place an order.	
						9. The system shall use these same code rules and messages for password reset (USR - 04) and for a changed contact number or email address (USR - 08).	
						10. The system shall display "We could not send the code. Please try again or use the other method." when the SMS or email cannot be sent.	
						11. The system shall accept each code only once. A code that was already used, or replaced by a newer one, is rejected with "Incorrect verification code."	
						12. The system shall allow a new code to be requested only 60 seconds after the last one and display "Please wait [n] seconds before requesting a new code."	
						13. The system shall allow no more than five codes per hour for the same contact number or email address and display "Too many code requests. Please try again in an hour." These rules also apply to password reset (USR - 04) and to changed contact numbers and emails (USR - 08).

USR - 34	Authentication & Account Management	As a User	link my Google account to my existing account	so that I can sign in with one tap and keep my orders and profile.	Given When Then	1. The system shall show the linking screen with the message "An account with this email already exists. Log in to link your Google account." and username and password fields when the Google email belongs to an account that is not yet linked to Google.	

A. Link the accounts **Given** the Google email belongs to an account not yet linked to Google **When** the linking screen opens **Then** the system shall show "An account with this email already exists. Log in to link your Google account." with username and password fields **When** the user enters the correct username and password **Then** the system shall link Google, sign the user in and display "Your Google account is linked." **Sample Data:** msantos / Meal@2026.	2. The system shall link the Google account only after the correct username and password of the existing account are entered, and never automatically.	
B. Wrong password **Given** the user is on the linking screen **When** the password is wrong **Then** the system shall display "Invalid username or password." **When** it is wrong five times in a row **Then** the system shall lock the account as in USR - 02	3. The system shall display "Invalid username or password." for a wrong password and apply the five-attempt lockout from USR - 02.	
C. Cancel or forgot password **Given** the user is on the linking screen **When** the user cancels **Then** the system shall link nothing and open the login screen **When** the user taps "Forgot password" **Then** the system shall open the reset flow in USR - 04	4. The system shall return to the login screen without linking anything when the user cancels.	
D. Already linked **Given** a Google account is linked to one user account **When** it is linked to a second account **Then** the system shall display "This Google account is already linked to another account."	5. The system shall allow a Google account to be linked to only one user account, and display "This Google account is already linked to another account." otherwise.	

					E. After linking **Given** the Google account is linked to msantos **When** the user taps "Continue with Google" or logs in with msantos / Meal@2026 **Then** the system shall sign in to the same account both ways	6. The system shall, after linking, sign the user in to the same account with Continue with Google, and keep the username and password working.

USR - 35	Home & Navigation	As a User	view meal recommendations based on my allergies and recorded health or dietary restrictions	so that I can quickly find meals that are suitable for my needs.	Given When Then	1. Recommendations shall be filtered using recorded allergies, health conditions and doctor-provided restrictions.	
					A. Matching recommendations **Given** I have completed my profile and signed in **When** the Home or Order page loads **Then** the system shall show available meal recommendations that match my recorded allergies, health conditions and doctor-provided restrictions.	2. Only available meals that pass the suitability checks shall be recommended.	
					B. No suitable meals **Given** I have completed my profile and signed in **When** no suitable meals are available **Then** the system shall explain that there are currently no matching meals and shall not display conflicting options.	3. The Dietitian shall review submitted orders before payment.

USR - 36	Home & Navigation	As a User	use the Home screen shortcuts to reach common tasks	so that I can get to meals, my current order, or my profile in one or two taps.	Given When Then	1. The system shall display shortcuts for "Browse Meals", "My Orders", and "My Account" on Home.	
					A. Home shortcuts **Given** the user is on the Home screen **When** the user selects "Browse Meals", "My Orders" or "My Account" **Then** the system shall open Meals, Orders or Account **Sample Data:** Shortcut labels exactly: "Browse Meals", "My Orders", "My Account" (not "Order a meal", "Track my order" or "My health profile").	2. The system shall keep the same shortcut labels ("Browse Meals", "My Orders", "My Account") and destinations throughout the application, and shall not use other labels for them.	

					B. No current order **Given** the user has no current order **When** the user selects "My Orders" **Then** the system shall open the order history and display "You have no orders yet." when appropriate **When** the Home screen is displayed **Then** the system shall show "You have no active orders" with a "Browse Meals" shortcut		
					C. Same labels everywhere **Given** the user moves through the application **When** a shortcut appears on another screen **Then** the system shall use the same labels and destinations

USR - 37	Home & Navigation	As a User	move between Home, Meal, Orders, and Account using the main navigation	so that I can find the main features from any main screen without guessing where they are.	Given When Then	1. The system shall provide a navigation bar with four destinations: Home, Meal, Orders, and Account, on the main signed-in screens.	
					A. Move between destinations **Given** the user is signed in **When** the user selects Home, Meal, Orders or Account **Then** the system shall open the matching screen and highlight it **When** the user moves between main screens **Then** the system shall keep every destination available **Sample Data:** Hover over (or tap) "Meal": the meal catalog and search tools open. Orders: current and previous orders. Account: profile and settings.	2. The system shall keep Help and service contact information accessible from Account and from relevant screens, without taking a permanent place in the four-item navigation bar.	
					B. Visitor not logged in **Given** the visitor has not logged in **When** the visitor taps Orders or Account **Then** the system shall display "Log in to continue" with a Log in button, and open the tapped destination after the user logs in	3. The system shall require sign-in before showing private profile information, health information, or order details, and shall display "Log in to continue" with a Log in button when a visitor who is not logged in taps Orders or Account.	

					C. Help access **Given** the user is on a main screen **When** the user needs help **Then** the system shall keep Help and service contact information available from Account and relevant screens, without a fifth item in the navigation bar

USR - 38	User Profile & Dietary Information	As a User	review the history of changes to the meal recipient's health and dietary information	so that I can check when the meal recipient's information changed and who changed it, and help ensure the profile stays accurate.	Given When Then	1. The system shall record changes to the meal recipient's health conditions, dietary restrictions, and food allergies with the previous value, new value, actor (the user who made the change), and timestamp.	
					A. Record a change **Given** the user changes health, dietary or allergy information **When** the change is saved **Then** the system shall record the previous value, new value, actor and timestamp **Sample Data:** Add Peanuts to allergies. Remove Diabetes from health conditions. Change the Peanuts note from "Skin rash" to "Hives". Family Member: Carlos Dizon adds Peanuts to Lia Dizon's allergies. Actor: Carlos Dizon. Meal recipient: Lia Dizon.	2. The system shall display the change history of the account (the user's own and the meal recipient's information) in Account, newest first, with the date and time, the field changed, and the old and new value for each entry.	
					B. View the history **Given** the user has recorded changes **When** the user opens Account > Change History **Then** the system shall list the entries newest first with the date and time, field changed, and old and new value **Sample Data:** "Skin rash > Hives".	3. The user shall not be able to edit or delete audit-history entries.	
					C. No changes yet **Given** the user has made no changes **When** the user opens the history **Then** the system shall display "No changes yet."	4. The system shall use append-only, tamper-evident event logging for relevant account and profile actions. Each event shall include a timestamp, user ID, event type, and a SHA-256 hash linked to the previous event's hash.	

					D. Protected entries **Given** history entries exist **When** the user tries to edit or delete one **Then** the system shall not allow it and shall flag a broken hash chain as a possible alteration when integrity is checked	5. The system shall verify the hash chain when audit-log integrity is checked and flag a broken chain as a possible alteration.	
						6. The user-facing history shall show only the user's permitted information; internal security metadata need not be exposed in the regular profile view.	
						7. The system shall display "No changes yet." when no profile changes have been recorded.	
						Passed	
						Failed

USR - 39	Meals & Ordering	As a User	see meal suggestions that match my recorded dietary information and preferences	so that I can choose suitable meals without manually checking every menu item.	Given When Then	1. The recommendation process shall consider all saved health and dietary information.	
					A. Generate meal suggestions **Given** my dietary profile is saved **When** meal suggestions are generated **Then** the system shall consider allergies, HTN, Diabetes, Gout, Kidney Problem, Low-Cholesterol Diet, other doctor-provided restrictions and my food preferences.	2. The system shall exclude meals that conflict with known allergies or restrictions.	
						3. The Dietitian shall be able to review suitability before an order proceeds to payment.	
						Passed	
						Failed

USR - 40	Authentication & Account Management	As a User	use a password-based account protected by secure password storage	so that my password is not stored or exposed as readable text.	Given When Then	1. The system shall never store a user's raw password.	
					A. Password storage **Given** a password-based account exists **When** the password is stored **Then** the system shall never store the raw password, only an Argon2id or bcrypt verifier with a unique salt **Sample Data:** Database check: no plaintext password is present.	2. The system shall store password verifiers using Argon2id or bcrypt with a unique salt and an appropriate work factor.	

					B. Login checks **Given** the stored verifier exists **When** valid and invalid passwords are entered **Then** the system shall verify them without logging or displaying the password and behave correctly for both	3. The system shall verify the entered password against the stored verifier without logging or displaying the password.	
					C. Password reset **Given** the user resets the password **When** the reset is saved **Then** the system shall replace the verifier and invalidate existing sessions	4. A password reset shall replace the verifier and invalidate existing sessions as defined by the account-security rules.	
						5. Test data shall confirm that the database contains no plaintext password and that valid and invalid login attempts behave correctly.

USR - 41	Authentication & Account Management	As a User	access only the account information and actions allowed for my role	so that my profile, health information, and orders stay private from other users.	Given When Then	1. The system shall check the authenticated session and assigned role before allowing access to protected screens or operations.	
					A. Own records only **Given** a user is logged in **When** the user opens or changes a record **Then** the system shall allow only the profile, dietary information and orders of the user's own account, including those of the meal recipient registered under it, except access explicitly authorized for a linked guardian or family member	2. A user account shall be allowed to view and change only the profile, dietary information, and orders of its own account, including the meal recipient registered under it, except for access explicitly authorized for a linked guardian/family member.	
					B. Another user's record **Given** a user changes a record identifier manually **When** the request is sent **Then** the system shall deny it	3. Requests for another user's private record shall be denied even if the record identifier is changed manually.	

					C. No valid session **Given** a request has no valid session **When** it reaches a protected screen or action **Then** the system shall redirect to sign-in or reject it, using a shared server-side check rather than a hidden button	4. Requests without a valid session shall be redirected to sign-in or rejected.	
						5. Authorization shall be enforced by a shared middleware or equivalent server-side gate; hiding a button in the interface alone shall not count as access control.	
						6. The implementation may represent roles with a bitmask or another explicit role-permission mapping, but permission checks shall produce the same deny-by-default behavior.	
						7. The system shall allow only the user of a Family Member account to view or change the meal recipient's records, because the meal recipient has no login of their own.	
						Passed	
						Failed

USR - 42	Security & Auditability	As a User	see a record of important changes I make to my profile	so that I can review updates to my health and dietary information and trust that the history cannot be quietly rewritten.	Given When Then	1. The system shall append an event when the user creates an account or changes profile, meal recipient, health, dietary, or allergy information. Relevant supported account and order actions, including login/logout and order-status changes, shall also be recorded where applicable.	
					A. Record events **Given** the user creates an account or changes profile, health, dietary or allergy information **When** the action completes **Then** the system shall append an event with a timestamp, user ID, event type, change details and a SHA-256 hash that includes the previous event's hash	2. Each event shall include a timestamp, user ID, event type, relevant action/change details, and a SHA-256 hash that incorporates the previous event's hash, and, for a Family Member account, the meal recipient the event concerns.	
					B. Altered events **Given** events exist **When** one is edited or removed **Then** the hash-chain integrity check shall report a mismatch or broken chain, and normal operations shall not edit or delete events	3. Existing events shall not be edited or deleted through normal application operations.	

					C. User view **Given** the user opens the activity record **When** the record is displayed **Then** the system shall show only the user's own events and no other users' events or internal security secrets	4. If a stored event is altered or removed, a hash-chain integrity check shall report a mismatch or broken chain.	
						5. Only actions and data actually supported by the user application shall be logged; no file-upload event shall be included unless file upload is added to scope.	
						6. The regular user interface shall not expose other users' events or internal security secrets.

USR - 43	Authentication & Account Management	As a User	choose whether I am registering For Myself or for a Family Member	so that the service knows whether I will receive the meals myself or I am managing the account for another person who will receive them.	Given When Then	1. The system shall display a "Who is this meal subscription for?" screen with the options "Signing Up for Myself" and "Signing Up for a Family Member" before the registration form.	Screen wording follows the design (Part 1): "Signing Up for Myself" / "Signing Up for a Family Member". The
					A. Choose "Signing Up for Myself" **Given** the user has selected Register **When** the registration type screen opens **Then** the system shall display "Who is this meal subscription for?" with two options, "Signing Up for Myself" (description: "I will receive and consume the meals.") and "Signing Up for a Family Member" (description: "Ordering for a parent, senior relative, or loved one."), and a Continue button **When** the user selects "Signing Up for Myself" and Continue **Then** the system shall open the registration form for the user's own details (USR - 01) and treat the user as the meal recipient, so no separate meal recipient details are asked **Sample Data:** Maria Santos (msantos) selects "Signing Up for Myself". The user and the meal recipient are the same person: Maria Santos.	2. The system shall show a short description under each option: "I will receive and consume the meals." (Signing Up for Myself) and "Ordering for a parent, senior relative, or loved one." (Signing Up for a Family Member).	

B. Choose "Signing Up for a Family Member" **Given** the user is on the registration type screen **When** the user selects "Signing Up for a Family Member" and Continue **Then** the system shall open the registration form for the user's own details (USR - 01) and, after the account is verified, ask for the details of the family member who will receive the meals (USR - 44) **Sample Data:** Carlos Dizon (cdizon) selects "Signing Up for a Family Member" to register for his daughter, Lia Dizon. Carlos is the user (he logs in and manages the app). Lia is the meal recipient (she receives the meals).	3. The system shall require one option to be selected and shall display "Please choose Signing Up for Myself or Signing Up for a Family Member to continue." when Continue is selected without a choice.	
C. No option selected **Given** the user is on the registration type screen and has not selected an option **When** the user selects Continue **Then** the system shall display "Please choose Signing Up for Myself or Signing Up for a Family Member to continue." and stay on the screen **Sample Data:** Continue selected with neither option chosen.	4. The system shall treat the user and the meal recipient as the same person when "Signing Up for Myself" is chosen, and shall not ask for separate meal recipient details.	
D. Continue with Google **Given** the user selects "Continue with Google" and the Google account has no account yet **When** no registration type has been chosen yet (for example, the user started from the login screen) **Then** the system shall show the registration type screen before creating the account and apply the chosen type to the new account **When** the user already chose a type before selecting "Continue with Google" **Then** the system shall use that choice and not ask again **Sample Data:** maria.santos@gmail.com continues with Google and chooses "Signing Up for Myself".	5. The system shall treat the user and the meal recipient as two different people when "Signing Up for a Family Member" is chosen. The login details, verification codes, and notifications stay with the user, and the meal recipient's details are entered separately (USR - 44).	

					E. Registration type shown **Given** the user has finished registration **When** the user opens Profile (USR - 07) or the Admin opens the user account **Then** the system shall show "Registered for: Myself" or "Registered for: Family Member" **Sample Data:** msantos: Registered for Myself. cdizon: Registered for Family Member.	6. The system shall show the registration type screen before creating a new Google account when no type has been chosen yet, and shall apply the chosen type to that account (USR - 30 and USR - 31).	
						7. The system shall store the registration type with the account and show it in the profile (USR - 07) and to the Admin.	
						Passed	
						Failed

USR - 44	User Profile & Dietary Information	As a User	enter the details of the family member who will receive the meals when I register for a Family Member	so that the kitchen, delivery staff, and Admin know who the meals are for, while my own account details stay separate.	Given When Then	1. The system shall ask for the meal recipient's details only when the registration type is Family Member (USR - 43), after the account is verified (USR - 33), or on the profile screen for a user who continued with Google (USR - 31).	
					A. Enter the meal recipient's details **Given** the user registered as Family Member, verified the account (USR - 33) and is on the meal recipient details screen **When** the user enters the meal recipient's first name, last name, relationship to the user and delivery address, ticks "I confirm that I am allowed to manage this person's meals and health information." and selects Save **Then** the system shall save the meal recipient as a separate person under the user's account, record the date and time of the confirmation, and open the health and dietary information screens for the meal recipient (USR - 09 to USR - 13) **Sample Data:** User: Carlos Dizon (cdizon), 09175550123. Meal recipient: Lia / Dizon / Child / 8 Sampaguita St., Quezon City. Confirmation ticked.	2. The system shall require the meal recipient's first name, last name, relationship to the user (Child, Parent, Spouse, Sibling, Grandparent, or Other), and delivery address. The middle name, suffix, and contact number are optional.	

B. Optional fields left blank **Given** the user is on the meal recipient details screen and has filled in the required fields and the confirmation **When** the contact number, middle name and suffix are left blank **Then** the system shall accept the details because these fields are optional **Sample Data:** Lia Dizon saved with no contact number, middle name or suffix.	3. The system shall display "Please fill in all required fields." when a required field is blank and "Please enter a valid contact number." when the contact number is not 11 digits or contains letters.	
C. Blank or invalid entries **Given** the user is on the meal recipient details screen **When** a required field is left blank **Then** the system shall display "Please fill in all required fields." **When** the meal recipient's contact number is entered and is not 11 digits or contains letters **Then** the system shall display "Please enter a valid contact number." **When** Save is selected with the confirmation unticked **Then** the system shall display "Please confirm that you are allowed to manage this person's information." and not save the details **Sample Data:** Blank delivery address. Contact number: 0917123. Confirmation: unticked.	4. The system shall require the user to tick "I confirm that I am allowed to manage this person's meals and health information." and shall display "Please confirm that you are allowed to manage this person's information." when it is unticked.	
D. The meal recipient does not log in **Given** the meal recipient has been saved **When** the account is used **Then** the system shall keep the user as the only person who logs in, with the user's own username and password, and shall create no username or password for the meal recipient **Sample Data:** Carlos logs in as cdizon. Lia Dizon has no username or password.	5. The system shall record the date and time of this confirmation and the user who gave it (see USR - 15).	

					E. Unfinished details **Given** the user closed the app before saving the meal recipient's details **When** the user signs in again **Then** the system shall show this screen again and not allow the meal menu or an order until the details are saved **Sample Data:** App closed after verification, then signed in again.	6. The system shall keep the meal recipient's details separate from the user's own details. The meal recipient has no username or password and does not log in.	
					F. For Myself accounts **Given** the user registered For Myself **When** the profile is completed **Then** the system shall not show this screen and shall use the user's own name, contact number and address as the meal recipient's details **Sample Data:** msantos (For Myself): no meal recipient screen is shown.	7. The system shall use the user's contact number for contact about an order when the meal recipient has no contact number.	
						8. The system shall not allow the meal menu or an order until the meal recipient's details are saved.	
						9. The system shall allow one meal recipient per account.	
						10. The system shall not ask for separate meal recipient details when the registration type is For Myself, and shall use the user's own details.	
						Passed	
						Failed

USR - 45	User Profile & Dietary Information	As a User	update the details of the meal recipient	so that the name, contact details, and delivery address of the person receiving the meals stay correct without changing my own account	Given When Then	1. The system shall show an "Edit meal recipient" option in the profile of Family Member accounts, separate from "Edit profile" for the user's own details (USR - 08).	

				details.	**A. Edit the meal recipient (Family Member)** **Given** the user registered as Family Member and is on the Edit meal recipient screen **When** the user changes the delivery address or name and saves **Then** the system shall save the change to the meal recipient only, leave the user's own details unchanged, and display "Meal recipient updated successfully." **Sample Data:** Lia Dizon's address changed from 8 Sampaguita St. to 15 Orchid St., Quezon City. Carlos Dizon's name and contact number are unchanged.	2. The system shall allow the meal recipient's first name, last name, middle name, suffix, relationship to the user, contact number, and delivery address to be edited.	
					B. Blank or invalid entries **Given** the user is on the Edit meal recipient screen **When** a required field is blank **Then** the system shall display "Please fill in all required fields." **When** the contact number is not 11 digits or contains letters **Then** the system shall display "Please enter a valid contact number." **Sample Data:** Blank last name. Contact number: 0917ABC4567.	3. The system shall apply the same required-field and contact number checks and messages as USR - 44.	
					C. For Myself accounts **Given** the user registered For Myself **When** the user edits the name, contact number or address in Edit profile (USR - 08) **Then** the system shall apply the change to the meal recipient as well, because they are the same person, and shall not show a separate Edit meal recipient screen **Sample Data:** Maria Santos changes the address to 45 Rizal Ave., Quezon City. Her orders are delivered to the new address.	4. The system shall display "Meal recipient updated successfully." after the changes are saved and shall leave the user's own details unchanged.	
					D. Leave with unsaved changes **Given** the user has edited a field without saving **When** the user presses Back **Then** the system shall ask for confirmation before leaving the screen	5. The system shall treat a change to the user's name, contact number, or address as a change to the meal recipient as well when the registration type is For Myself.	
						6. The system shall ask for confirmation before leaving the screen with unsaved changes.	

						7. The system shall record each change to the meal recipient's details in the change history (USR - 38) with the user who made it.	
						Passed

USR - 46	User Profile & Dietary Information	As a User	see clearly who is using the app and who the meals are for on every screen	so that I never mix up my own details with those of the person receiving the meals, especially when I manage the account for a family member.	Given When Then	1. The system shall show the person each screen applies to on Home, Profile, each health and dietary screen, the meal details and menu warnings, the order summary, the orders list, and the order details.	
					A. For Myself labels **Given** the user registered For Myself and is logged in **When** the user opens Home, Profile, the health and dietary screens, or the order summary **Then** the system shall use "you" and "your" (for example "Meals for you" and "Your health conditions") and shall not show a separate meal recipient **Sample Data:** Maria Santos sees "Meals for you" on Home and "Your health conditions".	2. The system shall use "you" and "your" and show no separate meal recipient for For Myself accounts.	
					B. Family Member labels **Given** the user registered as Family Member and is logged in **When** the user opens Home, Profile, the health and dietary screens, the meal details, or the order summary **Then** the system shall show the meal recipient's name on each screen and show the user's name only as the person logged in **Sample Data:** Carlos Dizon is logged in. Home: "Meals for Lia Dizon". Screen title: "Health conditions of Lia Dizon".	3. The system shall show the meal recipient's name on those screens for Family Member accounts, and the user's name only as the person logged in.	

					C. Order summary **Given** the user has chosen meals and delivery details **When** the order summary opens **Then** the system shall show "Ordered by" (the user) and "Meal recipient" (name and delivery address) as separate lines **When** the account is For Myself **Then** the system shall show the same person once as "Ordered by and for" **Sample Data:** Family Member: Ordered by Carlos Dizon. Meal recipient: Lia Dizon, 8 Sampaguita St., Quezon City. For Myself: Ordered by and for Maria Santos.	4. The system shall show "Ordered by" (the user) and "Meal recipient" (name and delivery address) in the order summary and the order details, and "Ordered by and for" for a For Myself account.	
					D. Warnings name the right person **Given** Peanuts is recorded as an allergy of the meal recipient **When** the user opens "Chicken Satay with Peanut Sauce" or adds it to an order **Then** the system shall display "This meal contains Peanuts, which is listed in your profile." for a For Myself account **And** "This meal contains Peanuts, which is listed in Lia Dizon's profile." for a Family Member account (USR - 17 and USR - 20) **Sample Data:** msantos (For Myself) and cdizon (Family Member, meal recipient Lia Dizon).	5. The system shall word allergy and dietary warnings with the meal recipient: "... which is listed in your profile." (For Myself) or "... which is listed in [meal recipient's name]'s profile." (Family Member).	
					E. Notifications go to the user **Given** an order exists for the meal recipient **When** an order notification is sent **Then** the system shall send it to the user, and for a Family Member account shall include the meal recipient's name (USR - 25) **Sample Data:** Carlos Dizon receives "Order TRK-2026-0004 for Lia Dizon is now Out for Delivery."	6. The system shall send order notifications to the user and include the meal recipient's name in notifications for Family Member orders.	
						7. The system shall keep the health, dietary, allergy, and delivery information with the meal recipient, and keep the login details, verification codes, and notifications with the user.

USR - 47	Authentication & Account Management	As a User	delete my account	so that I can stop using the service and have my personal and health information removed.	Given When Then	1. The system shall provide a "Delete account" option in Account (reachable from the main navigation, USR - 37) and shall require the user's password, or a new Google sign-in for an account that continues with Google, and a final confirmation before the account is deleted.	
					A. Delete the account **Given** the user is logged in and has no order in progress **When** the user selects Delete account, enters the password and selects Yes on the warning **Then** the system shall delete the account, end the session, show "Your account has been deleted." and open the login screen **Sample Data:** Username: msantos. Password: Meal@2026.	2. The system shall show this warning before the final confirmation: "Delete your account? This will permanently remove your profile and your health, dietary and allergy information. This cannot be undone." with Yes and No.	
					B. Cancel or wrong password **Given** the user is on the Delete account screen **When** the user selects No or Cancel, or leaves the screen **Then** the system shall keep the account unchanged **When** the password entered is wrong **Then** the system shall display "Incorrect password. Your account was not deleted." and keep the account **Sample Data:** Wrong password: Meal@2025.	3. The system shall keep the account unchanged when the user cancels or enters a wrong password, and shall display "Incorrect password. Your account was not deleted." for a wrong password.	

C. Account that continues with Google **Given** the account continues with Google and has no password **When** the user selects Delete account **Then** the system shall ask the user to sign in with Google again and, once confirmed, show the same warning as for other accounts **Sample Data:** Google account: maria.santos@gmail.com.	4. The system shall not delete an account that has an order in Pending, Preparing, Ready for pickup, or Out for delivery status, and shall display "You have an order in progress. Please wait until it is delivered or cancelled before deleting your account."	
D. Order in progress **Given** the user has an order that is not yet Delivered or Cancelled **When** the user selects Delete account **Then** the system shall display "You have an order in progress. Please wait until it is delivered or cancelled before deleting your account." and not delete the account **When** every order is Delivered or Cancelled **Then** the system shall allow the deletion to continue **Sample Data:** Order TRK-2026-0002 is Out for Delivery.	5. For a Family Member account, the system shall delete the meal recipient's profile, health conditions, dietary restrictions, allergies, preferences and guardian or family contacts together with the user's account, because the meal recipient has no login of their own (USR - 41), and shall name the meal recipient in the warning.	
E. Family Member account **Given** the user registered as a Family Member and has no order in progress **When** the user confirms the deletion **Then** the system shall delete the user's account and the meal recipient's profile and health, dietary and allergy information, and the warning shall have named the meal recipient **Sample Data:** Carlos Dizon deletes the account; the warning names Lia Dizon.	6. The system shall end every active session of the account on every device when it is deleted, including sessions kept with "Keep me logged in" (USR - 03).	

F. Logged in on another device **Given** the user is also logged in on a second device **When** the account is deleted on the first device **Then** the system shall end the session on the second device and open the login screen the next time the app is used there **Sample Data:** Phone and tablet, both logged in as msantos.	7. The system shall treat a deleted account as unregistered: login shall display "Invalid username or password.", password recovery shall display "No account found with this contact number." or "No account found with this email address.", and the username, contact number and email address shall be free to register again as a new, empty account (USR - 01).	
G. After deletion **Given** the account has been deleted **When** the old username and password are entered on the login screen **Then** the system shall display "Invalid username or password." **When** the old contact number is entered on the forgot password screen **Then** the system shall display "No account found with this contact number." **When** the same username, contact number and email address are used to register **Then** the system shall create a new account with no previous profile, health information or orders **Sample Data:** msantos, 09171234567, maria.santos@gmail.com.	8. The system shall keep completed and cancelled orders only in anonymised form (no name, contact number, email address, delivery address or health information) for the Admin's order and sales records, remove the user from the customer list (ADM - 19), and stop all notifications to the user.	

					H. Past orders and records **Given** the user had delivered order TRK-2026-0001 **When** the account is deleted **Then** the Admin shall still see the order with the customer shown as "Deleted user" and no contact, address or health information, the user shall no longer appear in the customer list, and no further notifications shall be sent **Sample Data:** Order TRK-2026-0001 (Delivered) shows "Deleted user".	9. The system shall append an account-deleted event to the activity record (USR - 42) with the date and time, user ID and event type but no personal details, and shall not edit or remove earlier events.	
					I. Another user's account **Given** a user is logged in **When** a request to delete another user's account is sent, for example by changing the account identifier manually **Then** the system shall deny it and leave that account unchanged (USR - 41)	10. The system shall allow only the account's own user to delete it, and shall deny any request to delete another user's account.

USR - 48	User Interface & Accessibility	As a User	use a clear and accessible interface with readable text, visible buttons and understandable instructions	so that older adults and younger family members can comfortably use F.I.L. Foods.	Given When Then	1. The interface shall use a consistent, eye-pleasing palette based on deep forest green (#174D3A), sage green (#E9F0E6), warm cream (#FFF8E9), warm gold (#E9A23B), charcoal (#343A35) and white (#FFFFFF).	New story. Applies across Login, Registration, Dietary Assessment, Home, Meals, Checkout, Tracking and Feedback screens.
					A. Readable interface **Given** the user opens any user-facing page **When** the page is displayed **Then** text, labels, fields and buttons shall be readable and clearly distinguishable.	2. Regular body text should generally be 16–18px or larger where practical.	
					B. Clear interaction feedback **Given** the user submits a form or makes a selection **When** the action succeeds or fails **Then** the system shall display a clear confirmation, warning or error message.	3. Buttons and interactive controls shall have clear labels and adequate touch/click areas.	

					C. Consistent visual design **Given** the user moves between the application screens **When** each screen is displayed **Then** the interface shall use a consistent and eye-pleasing visual style.	4. Text and controls shall have sufficient contrast.	
						5. Selected, disabled, warning, success and error states shall be visually distinguishable.	
						6. Forms shall use simple instructions and shall not overcrowd the screen.	
						7. The layout shall remain usable on supported screen sizes.

USR - 49	User Profile & Dietary Information	As a User	read the Terms and Conditions in clear, numbered sections	so that I know what I am agreeing to about my account, health information, orders, payment and delivery before I accept.	Given When Then	1. The system shall display the Terms and Conditions in numbered sections with short headings: 1. Using F.I.L. Foods, 2. Registering For Myself or for a Family Member, 3. Health, Dietary and Allergy Information, 4. Privacy and Data Protection, 5. Meals, Orders and Payment, 6. Delivery and Pickup, 7. Account Deletion, 8. Changes to These Terms, 9. Contact.	New story. Gives the full contents of the Terms and Conditions that USR - 15 displays.
					A. Open from the registration page **Given** the user is on the registration page **When** the user selects "Terms and Conditions" **Then** the system shall display the Terms and Conditions with the list of sections, the version number and the "Last updated" date **Sample Data:** Version 1.0, last updated 2026-11-12.	2. The system shall show a list of the section headings at the top, and selecting a heading shall scroll to that section.	
					B. Jump to a section **Given** the Terms and Conditions are open **When** the user selects "5. Meals, Orders and Payment" in the list of sections **Then** the system shall scroll to Section 5 and show its text, including the standard meal price of ₱300 and the limit of three meals per day **Sample Data:** Section 5 selected. Price: ₱300 per meal. Limit: 3 meals per day.	3. Section 2 shall state that a user who registers for a family member must be allowed to manage that person's meals and health information, that the user is the only person who logs in, and that one meal recipient is allowed per account (USR - 43 and USR - 44).	

C. Open from Profile or Account **Given** the user is logged in **When** the user opens the Terms and Conditions from Profile or Account **Then** the system shall display the current version and shall not change the date and time the user accepted them **Sample Data:** Maria Santos (msantos) opens them from Profile. Accepted on 2026-11-12 09:00 AM.	4. Section 3 shall state that health conditions, dietary restrictions and allergies are used only to recommend suitable meals and to prepare orders safely, that the Dietitian reviews each order before payment, that allergies are visible to the Admin, Dietitian, Kitchen Staff and Delivery Staff, and that the app does not replace the advice of a doctor.	
D. Family Member sections **Given** the user registered as Family Member **When** the user reads Section 2 and Section 3 **Then** the system shall display the statement that the user must be allowed to manage the meal recipient's meals and health information, and that this information is used to recommend and prepare suitable meals **Sample Data:** Carlos Dizon reads both sections before saving Lia Dizon's details (USR - 44).	5. Section 4 shall state what personal information is collected, why it is collected and who can see it, that the delivery address is visible only to the Delivery Staff and the Admin, that passwords are stored only in hashed form (USR - 40), and that the information is handled under the Data Privacy Act of 2012 (RA 10173).	
E. Health information and who can see it **Given** the user is reading Section 3 **When** the section is displayed **Then** the system shall state that allergies are visible to the Admin, Dietitian, Kitchen Staff and Delivery Staff, that the Dietitian reviews each order before payment, and that the app does not replace a doctor's advice **Sample Data:** Allergy: Peanuts. Visible to staff before the order is prepared.	6. Section 5 shall state the standard meal price of ₱300, the limit of one meal per meal time and three meals per day, that each order goes to the Dietitian for review, that payment is requested only after approval, and that only paid orders are prepared (USR - 20).	

F. Privacy and delivery address **Given** the user is reading Section 4 **When** the section is displayed **Then** the system shall state what personal information is collected, why it is collected and who can see it, that only the Delivery Staff and the Admin see the delivery address, and that the information is handled under RA 10173 **Sample Data:** Delivery address: 12 Mabini St., Quezon City. Visible to Delivery Staff and Admin only.	7. Section 6 shall state that the user chooses Delivery or Pickup, that Delivery needs a valid address and schedule, and that Pickup shows the pickup details and schedule (USR - 19).	
G. Account deletion and changes to the terms **Given** the user is reading Section 7 and Section 8 **When** the sections are displayed **Then** the system shall state that an account cannot be deleted while an order is in progress and that the user will be asked to accept any new version **Sample Data:** Order #00350 is Preparing, so account deletion is blocked (USR - 47).	8. Section 7 shall state that the user can delete the account from Account, that deletion is not possible while an order is in progress, and that deleting a Family Member account also deletes the meal recipient's information (USR - 47).	
H. Terms and Conditions cannot be loaded **Given** the device has no connection **When** the user selects "Terms and Conditions" **Then** the system shall display "The Terms and Conditions could not be loaded. Please try again." with a Try again button, and shall not let the user accept them until the text has loaded **Sample Data:** Airplane mode is on. After the connection returns, Try again loads the text.	9. Section 8 shall state that the Terms and Conditions may change and that the user will be asked to accept the new version (USR - 50). Section 9 shall give the service contact information shown in Help (USR - 37).	
	10. The system shall display the version number and the "Last updated" date of the Terms and Conditions.	
	11. The system shall make the Terms and Conditions reachable from the registration page, the profile screen of a user who continued with Google, Profile and Account, and shall use text of at least 16 px (USR - 26).	

						12. The system shall display "The Terms and Conditions could not be loaded. Please try again." with a Try again button when they cannot be loaded, and shall not let the user accept them until the text has loaded.

USR - 50	User Profile & Dietary Information	As a User	accept or decline the Terms and Conditions, and accept again when they change	so that my agreement is recorded with the version I accepted and I stay in control of how my information is used.	Given When Then	1. The system shall display an unticked box "I have read and agree to the Terms and Conditions" with a link to the Terms and Conditions (USR - 49) on the registration page and on the profile screen of a user who continued with Google (USR - 31).	New story. Applies to registration, Continue with Google and every login after an update (USR - 15, USR - 31, USR - 44).
					A. Accept and register **Given** the user is on the registration page with the registration details filled in **When** the user ticks "I have read and agree to the Terms and Conditions" and selects Register **Then** the system shall create the account and record the date and time, the user ID and the version number of the accepted Terms and Conditions **Sample Data:** Maria Santos (msantos) ticks the box on 2026-11-12 09:00 AM. Version 1.0 accepted.	2. The system shall display "You must accept the Terms and Conditions to continue." when the user selects Register or Save with the box unticked, and shall not create the account or save the profile (USR - 15).	
					B. Box left unticked **Given** the user is on the registration page with the box unticked **When** the user selects Register **Then** the system shall display "You must accept the Terms and Conditions to continue." and not create the account **Sample Data:** Carlos Dizon (cdizon). Box: unticked.	3. The system shall provide a Decline option next to the box. Selecting it shall return the user to the previous screen without creating or changing any account.	
					C. Decline the Terms and Conditions **Given** the user is on the registration page **When** the user selects Decline **Then** the system shall return to the previous screen without creating or changing any account **Sample Data:** Maria Santos selects Decline. No account "msantos" is created.	4. The system shall record, for every acceptance, the date and time, the user ID and the version number of the Terms and Conditions accepted (USR - 15).	

D. Continue with Google **Given** the user continued with Google and is on the profile screen **When** the user selects Save with the box unticked **Then** the system shall display "You must accept the Terms and Conditions to continue." and not save the profile **When** the box is ticked and Save is selected **Then** the system shall record the acceptance and save the profile (USR - 31) **Sample Data:** Maria Santos saves once with the box unticked, then ticks it and saves again.	5. The system shall append each acceptance to the activity record (USR - 42) and shall not allow the user to edit or delete it.	
E. Family Member confirmation **Given** the user registered as Family Member and has ticked the Terms and Conditions box **When** the user saves the meal recipient's details without the confirmation tick **Then** the system shall display "Please confirm that you are allowed to manage this person's information." and not save the details (USR - 44) **Sample Data:** Carlos Dizon ticked the Terms and Conditions box. Confirmation for Lia Dizon: unticked.	6. The system shall record only one acceptance for a version, even when Register or Save is selected twice.	
F. Acceptance cannot be saved **Given** the user ticked the box **When** the user selects Register and the connection fails **Then** the system shall display "We could not save your acceptance. Please try again." and not create the account **Sample Data:** Connection lost while registering.	7. For a Family Member, the system shall still require the separate confirmation "I confirm that I am allowed to manage this person's meals and health information." (USR - 44). Ticking the Terms and Conditions box shall not replace it.	
G. Register selected twice **Given** the user ticked the box **When** the user selects Register twice in a row **Then** the system shall record only one acceptance for this version **Sample Data:** Two taps within one second. One acceptance record: 2026-11-12 09:00 AM.	8. When a new version is published, the system shall display "We updated our Terms and Conditions. Please review and accept to continue." the next time the user logs in or opens the app, and shall require acceptance before the user continues.	

H. Terms and Conditions updated **Given** the user has an account and accepted version 1.0, and version 1.1 has been published **When** the user logs in or opens the app **Then** the system shall display "We updated our Terms and Conditions. Please review and accept to continue." with the new version and its "Last updated" date **When** the user opens the new version, ticks the box and selects Accept **Then** the system shall record the date and time, the user ID and version 1.1, and continue to the Home screen **Sample Data:** msantos accepted version 1.0 on 2026-11-12. Version 1.1 is published later.	9. When the user declines the updated version, the system shall end the session, keep the account unchanged, and display "You need to accept the updated Terms and Conditions to keep using F.I.L. Foods." The user shall be able to log in again later to review and accept.	
I. Decline the updated terms **Given** the updated Terms and Conditions are displayed **When** the user selects Decline **Then** the system shall end the session, keep the account and all saved information unchanged, and display "You need to accept the updated Terms and Conditions to keep using F.I.L. Foods." **When** the user logs in again later **Then** the system shall display the updated Terms and Conditions again **Sample Data:** cdizon declines version 1.1 and logs in the next day. The prompt appears again.	10. The system shall not cancel or change an order that is already in progress when a new version is published, and shall still send its status notifications (USR - 24).	
J. Orders when the terms change **Given** the user has an order in progress when a new version is published **When** the user has not yet accepted the new version **Then** the system shall keep preparing and delivering the order, shall not cancel or change it, and shall still send its status notifications **Sample Data:** Order #00350 is Preparing when version 1.1 is published.	11. The system shall display "We could not save your acceptance. Please try again." and shall not create the account when the acceptance cannot be saved.	

					K. Acceptance record **Given** the user has accepted a version **When** the user opens the activity record **Then** the system shall show the date and time and the version accepted, and shall not allow the entry to be edited or deleted (USR - 42) **Sample Data:** Accepted Terms and Conditions version 1.0, 2026-11-12 09:00 AM.	12. The system shall use the same box, messages and acceptance record for sign-up with a username and password and for Continue with Google (USR - 01 and USR - 30).
