Admin Module						
Precondition: The Admin has an account, is logged in to the F.I.L. Foods staff app, and the menu, meal prices, plans, staff accounts and customer orders are available in the system.						
Postcondition: Approved menu, pricing, plan, staff and order changes are saved, the affected roles see the updates, and important actions are recorded in the audit log.						
No.	**Epic (System Component)**	**Persona (User)**	**I want to (action)**	**So that (benefit or value)**	**Scenarios (Given / When / Then)**	**Acceptance Criteria (System Requirement)**
ADM - 01	Authentication & Account Management	As an Admin	choose my role on the Select Your Role screen	so that I reach the sign-in that belongs to my job.	Given When Then	1. The system shall show only the role cards listed for this entry screen.
					A. Pick the role **Given** the app has just opened and the Select Your Role screen shows the title "Select Your Role" and "Choose your role to continue" **When** the screen is displayed **Then** it shall show four cards: ADMIN ("Managing staffs, menu, plans, meal options, etc"), Dietitian ("Manage nutrition plans and meal options"), Kitchen Staff ("Prepare and manage food orders") and Delivery Staff ("Handle deliveries and track orders"), each with an icon and an arrow button **When** the Admin card is selected **Then** the system shall open the Admin Log in screen (label "Admin Panel")	2. The system shall highlight the selected card with the light-green fill and Primary Green border.
					B. Back **Given** a role Log in screen is open **When** the back arrow is selected **Then** the system shall return to Select Your Role without losing the chosen role card highlight

ADM - 02	Authentication & Account Management	As an Admin	log in with my work email and password	so that only authorised Admin staff can open the Admin Panel and its information.	Given When Then	1. The system shall show the Log in screen with: email field (mail icon, placeholder "Email Address"), password field (lock icon, eye icon), the "Remember me" tick box, the "Forgot password?" link, a primary "Log In" button, an "or" divider and a "Continue with Google" button.

A. Valid credentials **Given** the Admin is on the Admin Panel Log in screen showing the F.I.L Foods logo, the title "F.I.L Foods", the label "Admin Panel", the tagline and the footer "F.I.L Foods © 2026" **When** the staff member enters admin@filfoods.ph and the correct password and selects Log In **Then** the system shall open the Admin Dashboard **And** a green banner shall show "Logged in successfully" at the top of the Dashboard content **And** the bottom navigation shall show only: Dashboard, Orders, Menu, Staff and Settings, with Dashboard marked active **Sample Data:** Email: admin@filfoods.ph. Password: ••••••••••.	2. The system shall validate that the email contains "@" and that both fields are filled before checking credentials.
B. Wrong email format **Given** the Log in screen is open **When** the email is typed as adminfilfoods.ph (no @) and Log In is selected **Then** the system shall keep the staff member on the Log in screen **And** the email field shall get a red border and show "Invalid email. Add an @ before filfoods.ph and try again." **And** the password dots and the Remember me tick shall stay as entered **Sample Data:** Email: adminfilfoods.ph. Password: ••••••••••.	3. The system shall display the exact messages: "Invalid email. Add an @ before filfoods.ph and try again.", "Incorrect password. Try again or tap Forgot password?", "Email and password are required." and "Could not connect".
C. Wrong password **Given** the Log in screen is open **When** admin@filfoods.ph is entered with a wrong password and Log In is selected **Then** the system shall show "Incorrect password. Try again or tap Forgot password?" under the password field, with the field outlined in red **And** no session shall be created **Sample Data:** Email: admin@filfoods.ph. Password: wrong value.	4. The system shall open the Dashboard of the signed-in role only and show the "Logged in successfully" banner once.

					D. Blank fields **Given** the Log in screen is open with empty inputs (placeholders "Email Address" and "Password") **When** Log In is selected with both inputs empty **Then** the system shall stay on Log in and show the heading "Please check your details" **And** the inputs shall show the prompts "Enter your email" and "Enter your password" **And** the message "Email and password are required." shall be shown (outcome H03)	5. The system shall show the role label "Admin Panel" and not any other role's label on this screen (Figma Dietitian Log in currently reads "Admin Panel" and must read "Dietitian").
					E. Show / hide password and Remember me **Given** the Log in screen is open **When** the eye icon is selected **Then** the password shall be revealed as plain text and the icon shall change (outcome H01) **When** the eye icon is selected again, or Remember me is unticked **Then** the password shall be masked again and the device shall not be remembered (outcome H02)	6. The system shall store passwords only as salted hashes and shall never display or log a password in readable form.
					F. Connection failure **Given** the staff member selects Log In and the network is down **When** the request fails **Then** the system shall show "Could not connect" and "Your request was not completed. Check your connection and try again." **And** the entered details shall be kept, no success message shall appear, and the buttons "Try again" and "Go back" shall be offered (outcome H10)	7. The system shall restrict Admin accounts to the features listed in this module.

ADM - 03	Authentication & Account Management	As an Admin	recover my password through my account email	so that I can regain access without asking the Admin to do it for me.	Given When Then	1. The system shall send a reset link only to an existing account but shall always show the neutral wording "If an account exists for this email…".

A. Request a reset link **Given** the Log in screen is open **When** "Forgot password?" is selected **Then** the system shall open "Forgot password?" with the text "Enter your account email to receive a reset link.", an "Email Address" field, "Send reset link" and "Back to login" (H04) **When** admin@filfoods.ph is submitted **Then** the system shall show "Check your email" and "If an account exists for this email, a reset link is on its way." **And** the screen shall show "Email: admin@filfoods.ph", "Check your inbox and spam folder.", "Resend link" and "Back to login" (H05) **Sample Data:** Email: admin@filfoods.ph	2. The system shall reject malformed or blank emails with the messages in the scenarios and send nothing.
B. Invalid email **Given** the recovery form is open **When** adminfilfoods.ph is submitted **Then** the system shall show "Check the email address below." and "Enter a valid email address, such as name@example.com." **And** no message shall be sent (H11) **Sample Data:** Email: adminfilfoods.ph	3. The system shall require both password fields to match and shall change the password only after a successful reset.
C. Choose a new password **Given** the staff member opened a valid reset link **When** the screen "Reset password" is shown **Then** it shall show "Create a new password for your account.", "New password", "Confirm password" and the buttons "Reset password" and "Cancel" (H06) **When** the two passwords do not match **Then** the system shall show "Passwords do not match. Enter the same password in both fields." and stay on the form (H12) **When** both match and Reset password is selected **Then** the system shall show "Password updated" and "Your new password is ready. Sign in again to continue." **And** "Back to login" shall return to this role's Log in; the old password shall fail and the new one shall work (H07)	4. The system shall invalidate a reset link after use or expiry.

					D. Expired or used link **Given** the reset link has expired or was already used **When** the link is opened **Then** the system shall show "Link expired" and "This reset link has expired or has already been used." **And** it shall offer "Request a new link" (back to H04) and "Back to login"; no password shall change (H13)

ADM - 04	Authentication & Account Management	As an Admin	continue with my Google work account	so that I can sign in without typing a password.	Given When Then	1. The system shall create a session only when the Google identity matches a staff account that holds the selected role.
					A. Authorised Google account **Given** the Log in screen is open **When** "Continue with Google" is selected **Then** the system shall show "Continue with Google", "Choose a work account for filfoods Food.", the account "admin@filfoods.ph", "Use another account", "Continue" and "Cancel" (H08) **When** an authorised account is continued **Then** the system shall open the Admin Dashboard with the banner "Logged in successfully" **When** Cancel is selected **Then** the system shall return to the Log in screen unchanged	2. The system shall never create a new staff account from a Google sign-in; only the Admin creates staff.
					B. Unauthorised Google account **Given** Google confirms the identity but the account has no Admin role **When** the account is continued **Then** the system shall show "Account not authorized" and "This account is not allowed to access the selected role." **And** it shall add "No session has been created." and "Contact your administrator if you need access." **And** the buttons "Choose another account" and "Back to login" shall be shown (H09)	3. The system shall show the Google "G" mark beside the label "Continue with Google".

ADM - 05	Home & Navigation	As an Admin	open my notifications from the bell icon	so that I can see new activity for my role in one place.	Given When Then	1. The system shall show notifications only for records the signed-in role is allowed to open.
					A. Notifications list **Given** the Admin is on a screen whose header shows the bell icon **When** the bell is selected **Then** the system shall open "Notifications" listing only items allowed for this role, for example "Order #00350 is pending" and "Menu item updated" followed by "No more notifications" **And** selecting an order notification shall open that order's detail screen for this role; Back returns to the source screen (S01)	2. The system shall mark an item as read when opened without changing the order or menu data.
					B. Empty inbox **Given** there are no notifications **When** the bell is selected **Then** the system shall show "You’re all caught up." and "New updates will appear here." with a Back button; this is not an error (S02)

ADM - 06	Settings & Profile	As an Admin	view and edit my account details in Settings	so that my name and email stay correct.	Given When Then	1. The system shall show the signed-in account's own name and email only.
					A. View Settings **Given** the Admin is signed in **When** Settings is selected in the bottom navigation **Then** the system shall show the title "Settings", the avatar initial "A", "Admin Account", "admin@filfoods.ph" and the button "Edit Profile" **And** below it: App Preferences (Language "English", Appearance "Light Mode"); System: About F.I.L Foods, Help & Support, Log Out	2. The system shall validate the email format before saving.

					B. Edit profile **Given** Edit Profile is selected **When** the system opens "Edit Profile" with the prefilled "Full name" and "Email address" and the staff member changes the email to a valid value and selects Save changes **Then** the system shall show "Profile updated" and "Your changes have been saved." with the new name and email and a "Back to Settings" button (S03, S04) **When** the email is typed without "@" **Then** the system shall show "Enter a valid email address." and stay in the editor (S05) **When** Back or Cancel is selected after changes **Then** the system shall ask "Leave without saving your changes?" with "Discard changes" and "Keep editing" (S10) **Sample Data:** Full name: Admin Account. Email: admin.updated@filfoods.ph (example).	3. The system shall not change the role through Edit Profile.

ADM - 07	Settings & Profile	As an Admin	set language and appearance	so that the app suits how I work.	Given When Then	1. The system shall apply a preference only after Apply.
					A. Language **Given** Settings is open **When** Language is selected **Then** the system shall show a choice screen with "English" and "Filipino", and "Apply" / "Cancel"; Apply with Filipino shall show the Settings labels in Filipino (S08, S16); Cancel keeps the prior language	2. The system shall keep each preference per account.
					B. Appearance **Given** Settings is open **When** Appearance is selected **Then** the system shall show "Light Mode", "Dark Mode" and "Use device setting" with Apply / Cancel; Dark + Apply applies the dark theme (S09, S11); device setting shows "Current device theme: Light" (S17)	3. The system shall not show the Admin a Notifications switch. The Admin shall always receive notifications for the records the Admin may open (ADM - 05).

					C. No Notifications switch **Given** Settings is open as an Admin **When** the Admin views App Preferences **Then** the system shall show only Language and Appearance, with no Notifications switch, and new items shall keep arriving in the bell inbox (ADM - 05)

ADM - 10	Dashboard	As an Admin	see totals for orders, sales, customers and menu items on my Dashboard	so that I can understand how the business is doing today.	Given When Then	1. The system shall show the four metrics and Sales Overview to the Admin only.

					A. Open the Dashboard **Given** the Admin has logged in successfully **When** the Dashboard loads **Then** the header shall show the F.I.L Foods mark, "F.I.L Foods", "Admin Panel", the bell and the avatar "A" **And** the greeting shall read "Welcome back, Admin!" and "Here's what's happening today." **And** four metric cards shall show: Total Orders 124 (↑ +12%), Total Sales ₱8,750.00 (↑ +15%), Total Customers 892 (↑ +8%) and Menu Items 24 (↑ +2%) **Sample Data:** Orders 124 / Sales ₱8,750.00 / Customers 892 / Menu items 24.	2. Metric values shall be calculated from stored orders, customers and menu items, not typed in.
					B. Recent Orders **Given** the Dashboard is open **When** the Recent Orders card is displayed **Then** it shall list #00350 Juan Dela Cruz Pending Oct 29, 2026 08:45 PM; #00349 Maria Santos Preparing 08:30 PM; #00348 Carlos Reyes Delivered 07:50 PM, each with a food image and status badge **And** "View all" shall open Admin Orders; selecting a row shall open that order's detail (A09)	3. The percentage arrows shall be green when positive.
					C. Sales Overview **Given** the Dashboard is open **When** the Sales Overview card is displayed **Then** it shall show a line-and-area chart for "This Week" with x labels Week 1–Week 4 and y scale 0, 2k, 4k, 6k, 8k **And** the period filter "This Week" shall open the choice "This Week" / "This Month" with Apply and Cancel (A10) **And** Month + Apply shall show "This Month", "Period selection applied" and "Monthly data is not supplied." (A11)

ADM - 11	Orders	As an Admin	view, search and filter all customer orders and open any order	so that I can monitor every order in the business.	Given When Then	1. The system shall show every order to the Admin including full customer name and price.

A. Order list **Given** the Admin selects Orders in the bottom navigation **When** the screen opens **Then** the title "Orders" and a basket icon shall be shown with the search box "Search orders..." and filters All, Pending, Preparing, Delivered **And** each card shall show food image, order number, FULL customer name, date and time, status badge and price: #00350 Juan Dela Cruz Pending ₱120.00 08:45 PM; #00349 Maria Santos Preparing ₱99.00 08:30 PM; #00348 Carlos Reyes Delivered ₱180.00 07:50 PM; #00347 Ana Garcia Cancelled ₱85.00 07:20 PM; #00346 Mark Villanueva Delivered ₱140.00 06:55 PM (all Oct 29, 2026)	2. The system shall keep the chosen search and filter when Back is used.
B. Search and filter **Given** Orders is open **When** "Maria" is typed **Then** only #00349 Maria Santos shall be listed (O01) **When** "xyz-no-match" is typed **Then** the system shall show "No orders found", "Try another name or order number." and "Clear search" (O02) **When** Pending / Preparing / Delivered is selected **Then** only orders with that status shall be listed (O04 / O05 / O06); All restores the full list (O03)	3. Status badges use the palette: Pending #FFDDBF, Preparing #D8F3DC, Delivered #1C773A, Cancelled #D76566.
C. Order detail **Given** an order card is selected **When** #00350 is opened **Then** "Order Details" shall show "#00350 · Juan Dela Cruz", Pending, "Oct 29, 2026 · 08:45 PM", "Recorded total ₱120.00" and "Back to Orders" (A09) **When** #00348 or #00347 is opened **Then** the detail shall be read-only: Delivered "Total ₱180.00" with "No further kitchen action." (O07) or Cancelled "Recorded amount ₱85.00" (O08) **When** the basket icon is selected **Then** the system shall show "Order Summary", "No order selected", "No checkout or payment started." (O09)	4. The system shall search the customer name and the order number as the Admin types, ignoring capital letters, extra spaces and accents, and shall also find names with small typing mistakes: one wrong, missing, extra or swapped letter for words of 3 to 5 letters, and up to two for words of 6 or more letters.

					D. Fuzzy search: typing mistakes and partial names **Given** Orders is open with the five sample orders listed **When** "Mria" is typed (a missing letter) **Then** #00349 Maria Santos shall be listed **When** "carols" is typed (two letters swapped) **Then** #00348 Carlos Reyes shall be listed **When** "Villanueba" is typed (one wrong letter) **Then** #00346 Mark Villanueva shall be listed **When** "Garcia Ana" is typed (words in a different order) **Then** #00347 Ana Garcia shall be listed **When** "Mar" is typed (a partial name) **Then** #00349 Maria Santos and #00346 Mark Villanueva shall be listed, newest first	5. The system shall also match partial names, match several typed words in any order (every word must match), and list exact and partial matches before spelling-corrected matches; matches of the same kind are listed newest first.
					E. Fuzzy search: limits and combined filters **Given** Orders is open with the five sample orders listed **When** "350" or "#00350" is typed **Then** only #00350 Juan Dela Cruz shall be listed **When** "00359" is typed (one wrong digit) **Then** the system shall show "No orders found", "Try another name or order number." and "Clear search", because order numbers are never spelling-corrected **When** "Jon" is typed (too different from any name) **Then** the system shall show the same "No orders found" message **When** "Mria" is typed and Delivered is selected **Then** the system shall show "No orders found", because Maria Santos is Preparing **When** the search box is cleared **Then** the full list shall be restored	6. The system shall match order numbers only exactly or partially, never by spelling correction. Search shall start from 2 typed characters, work together with the status filter, and show "No orders found" when nothing is close enough.

ADM - 21	Settings & Profile	As an Admin	control which notifications Kitchen Staff and Delivery Staff receive	so that kitchen and delivery staff see only the notifications I decide they need, and only I can change them.	Given When Then	1. The system shall allow only the Admin to turn notifications on or off for Kitchen Staff and Delivery Staff, and to choose which order and menu notifications each of these roles receives.
					A. Turn notifications on or off for a role **Given** the Admin is signed in and Settings is open **When** the Admin opens the "Staff Notifications" row (shown separately from App Preferences) and turns the Kitchen Staff switch OFF **Then** the system shall ask "Turn off notifications for Kitchen Staff?" with "Turn off" and "Keep on" **When** the Admin selects "Turn off" **Then** the system shall show "Notification settings saved." and new items shall stop arriving in the Kitchen Staff bell inbox **When** the Admin turns the switch ON again **Then** new items shall arrive again **Sample Data:** Role: Kitchen Staff. Switch: ON to OFF to ON.	2. The system shall not show Kitchen Staff or Delivery Staff any control to turn their notifications on or off, change which notifications they receive, or delete them (KIT - 07, DEL - 07), and shall deny such a request even if it is sent directly.
					B. Choose which notifications a role receives **Given** the Admin has opened Staff Notifications for a role **When** the Admin turns individual notification types ON or OFF and selects Save **Then** the system shall show "Notification settings saved." and send that role only the types that are ON **When** the Admin turns every type OFF for a role **Then** the system shall treat it as notifications OFF for that role **Sample Data:** Kitchen Staff: New order ON, Menu item updated ON. Delivery Staff: Order ready for pickup ON, Menu item updated OFF.	3. The system shall display "Notification settings saved." after a change is saved.

					C. Staff cannot change their notifications **Given** a Kitchen Staff or Delivery Staff member is signed in **When** the staff member opens Settings **Then** the system shall show only Language and Appearance under App Preferences and no Notifications switch **When** a request to change a notification setting is sent by the staff member **Then** the system shall deny it and leave the Admin's setting unchanged **Sample Data:** Staff: kitchen@filfoods.ph, delivery@filfoods.ph.	4. The system shall apply a change from the next notification onward and keep notifications already received viewable.
					D. Change is logged **Given** the Admin has changed a notification setting **When** the change is saved **Then** the system shall record it in the audit log (ADM - 20) under the Admin account with the role, the setting, the old and new value, and the date and time	5. The system shall log every notification setting change under the Admin account.
