Dietitian Module						
Precondition: The Dietitian has a staff account created by the Admin and is logged in. User profiles, allergies, health conditions, doctor-provided restrictions, menu items and submitted orders are available.						
Postcondition: The Dietitian has reviewed the user's dietary information and submitted meal selections, and has approved or returned orders for correction before payment. Health information changes are recorded.						
No.	**Epic (System Component)**	**Persona (User)**	**I want to (action)**	**So that (benefit or value)**	**Scenarios (Given / When / Then)**	**Acceptance Criteria (System Requirement)**
DIT - 01	Authentication & Account Management	As a Dietitian	choose my role on the Select Your Role screen	so that I reach the sign-in that belongs to my job.	Given When Then	1. The system shall show only the role cards listed for this entry screen.
					A. Pick the role **Given** the app has just opened and the Select Your Role screen shows the title "Select Your Role" and "Choose your role to continue" **When** the screen is displayed **Then** it shall show two cards: Dietitian ("Manage nutrition plans and meal options") and View Orders ("Track customer orders"), each with an icon and an arrow button **When** the Dietitian card is selected **Then** the system shall open the Dietitian Log in screen; View Orders also opens Dietitian login and then Orders	2. The system shall highlight the selected card with the light-green fill and Primary Green border.
					B. Back **Given** a role Log in screen is open **When** the back arrow is selected **Then** the system shall return to Select Your Role without losing the chosen role card highlight

DIT - 02	Authentication & Account Management	As a Dietitian	log in with my work email and password	so that only authorised Dietitian staff can open the Dietitian and its information.	Given When Then	1. The system shall show the Log in screen with: email field (mail icon, placeholder "Email Address"), password field (lock icon, eye icon), the "Remember me" tick box, the "Forgot password?" link, a primary "Log In" button, an "or" divider and a "Continue with Google" button.

A. Valid credentials **Given** the Dietitian is on the Dietitian Log in screen showing the F.I.L Foods logo, the title "F.I.L Foods", the label "Dietitian", the tagline and the footer "F.I.L Foods © 2026" **When** the staff member enters dietitian@filfoods.ph and the correct password and selects Log In **Then** the system shall open the Dietitian Dashboard **And** a green banner shall show "Logged in successfully" at the top of the Dashboard content **And** the bottom navigation shall show only: Dashboard, Orders, Menu and Settings, with Dashboard marked active **Sample Data:** Email: dietitian@filfoods.ph. Password: ••••••••••.	2. The system shall validate that the email contains "@" and that both fields are filled before checking credentials.
B. Wrong email format **Given** the Log in screen is open **When** the email is typed as dietitianfilfoods.ph (no @) and Log In is selected **Then** the system shall keep the staff member on the Log in screen **And** the email field shall get a red border and show "Invalid email. Add an @ before filfoods.ph and try again." **And** the password dots and the Remember me tick shall stay as entered **Sample Data:** Email: dietitianfilfoods.ph. Password: ••••••••••.	3. The system shall display the exact messages: "Invalid email. Add an @ before filfoods.ph and try again.", "Incorrect password. Try again or tap Forgot password?", "Email and password are required." and "Could not connect".
C. Wrong password **Given** the Log in screen is open **When** dietitian@filfoods.ph is entered with a wrong password and Log In is selected **Then** the system shall show "Incorrect password. Try again or tap Forgot password?" under the password field, with the field outlined in red **And** no session shall be created **Sample Data:** Email: dietitian@filfoods.ph. Password: wrong value.	4. The system shall open the Dashboard of the signed-in role only and show the "Logged in successfully" banner once.

					D. Blank fields **Given** the Log in screen is open with empty inputs (placeholders "Email Address" and "Password") **When** Log In is selected with both inputs empty **Then** the system shall stay on Log in and show the heading "Please check your details" **And** the inputs shall show the prompts "Enter your email" and "Enter your password" **And** the message "Email and password are required." shall be shown (outcome H03)	5. The system shall show the role label "Dietitian" and not any other role's label on this screen (Figma Dietitian Log in currently reads "Admin Panel" and must read "Dietitian").
					E. Show / hide password and Remember me **Given** the Log in screen is open **When** the eye icon is selected **Then** the password shall be revealed as plain text and the icon shall change (outcome H01) **When** the eye icon is selected again, or Remember me is unticked **Then** the password shall be masked again and the device shall not be remembered (outcome H02)	6. The system shall store passwords only as salted hashes and shall never display or log a password in readable form.
					F. Connection failure **Given** the staff member selects Log In and the network is down **When** the request fails **Then** the system shall show "Could not connect" and "Your request was not completed. Check your connection and try again." **And** the entered details shall be kept, no success message shall appear, and the buttons "Try again" and "Go back" shall be offered (outcome H10)	7. The system shall restrict Dietitian accounts to the features listed in this module.

DIT - 03	Authentication & Account Management	As a Dietitian	recover my password through my account email	so that I can regain access without asking the Admin to do it for me.	Given When Then	1. The system shall send a reset link only to an existing account but shall always show the neutral wording "If an account exists for this email…".
					A. Request a reset link **Given** the Log in screen is open **When** "Forgot password?" is selected **Then** the system shall open "Forgot password?" with the text "Enter your account email to receive a reset link.", an "Email Address" field, "Send reset link" and "Back to login" (H04) **When** dietitian@filfoods.ph is submitted **Then** the system shall show "Check your email" and "If an account exists for this email, a reset link is on its way." **And** the screen shall show "Email: dietitian@filfoods.ph", "Check your inbox and spam folder.", "Resend link" and "Back to login" (H05) **Sample Data:** Email: dietitian@filfoods.ph	2. The system shall reject malformed or blank emails with the messages in the scenarios and send nothing.
					B. Invalid email **Given** the recovery form is open **When** dietitianfilfoods.ph is submitted **Then** the system shall show "Check the email address below." and "Enter a valid email address, such as name@example.com." **And** no message shall be sent (H11) **Sample Data:** Email: dietitianfilfoods.ph	3. The system shall require both password fields to match and shall change the password only after a successful reset.

					C. Choose a new password **Given** the staff member opened a valid reset link **When** the screen "Reset password" is shown **Then** it shall show "Create a new password for your account.", "New password", "Confirm password" and the buttons "Reset password" and "Cancel" (H06) **When** the two passwords do not match **Then** the system shall show "Passwords do not match. Enter the same password in both fields." and stay on the form (H12) **When** both match and Reset password is selected **Then** the system shall show "Password updated" and "Your new password is ready. Sign in again to continue." **And** "Back to login" shall return to this role's Log in; the old password shall fail and the new one shall work (H07)	4. The system shall invalidate a reset link after use or expiry.
					D. Expired or used link **Given** the reset link has expired or was already used **When** the link is opened **Then** the system shall show "Link expired" and "This reset link has expired or has already been used." **And** it shall offer "Request a new link" (back to H04) and "Back to login"; no password shall change (H13)

DIT - 04	Authentication & Account Management	As a Dietitian	continue with my Google work account	so that I can sign in without typing a password.	Given When Then	1. The system shall create a session only when the Google identity matches a staff account that holds the selected role.

					A. Authorised Google account **Given** the Log in screen is open **When** "Continue with Google" is selected **Then** the system shall show "Continue with Google", "Choose a work account for filfoods Food.", the account "dietitian@filfoods.ph", "Use another account", "Continue" and "Cancel" (H08) **When** an authorised account is continued **Then** the system shall open the Dietitian Dashboard with the banner "Logged in successfully" **When** Cancel is selected **Then** the system shall return to the Log in screen unchanged	2. The system shall never create a new staff account from a Google sign-in; only the Admin creates staff.
					B. Unauthorised Google account **Given** Google confirms the identity but the account has no Dietitian role **When** the account is continued **Then** the system shall show "Account not authorized" and "This account is not allowed to access the selected role." **And** it shall add "No session has been created." and "Contact your administrator if you need access." **And** the buttons "Choose another account" and "Back to login" shall be shown (H09)	3. The system shall show the Google "G" mark beside the label "Continue with Google".

DIT - 05	Home & Navigation	As a Dietitian	open my notifications from the bell icon	so that I can see new activity for my role in one place.	Given When Then	1. The system shall show notifications only for records the signed-in role is allowed to open.

					A. Notifications list **Given** the Dietitian is on a screen whose header shows the bell icon **When** the bell is selected **Then** the system shall open "Notifications" listing only items allowed for this role, for example "Order #00350 is pending" and "Menu item updated" followed by "No more notifications" **And** selecting an order notification shall open that order's detail screen for this role; Back returns to the source screen (S01)	2. The system shall mark an item as read when opened without changing the order or menu data.
					B. Empty inbox **Given** there are no notifications **When** the bell is selected **Then** the system shall show "You're all caught up." and "New updates will appear here." with a Back button; this is not an error (S02)

DIT - 06	Settings & Profile	As a Dietitian	view and edit my account details in Settings	so that my name and email stay correct.	Given When Then	1. The system shall show the signed-in account's own name and email only.
					A. View Settings **Given** the Dietitian is signed in **When** Settings is selected in the bottom navigation **Then** the system shall show the title "Settings", the avatar initial "D", "Dietitian Account", "dietitian@filfoods.ph" and the button "Edit Profile" **And** below it: App Preferences (Notifications switch, Language "English", Appearance "Light Mode"); Support: Help & Support, About F.I.L Foods; and a Log out row (added because the source screen has none)	2. The system shall validate the email format before saving.

					B. Edit profile **Given** Edit Profile is selected **When** the system opens "Edit Profile" with the prefilled "Full name" and "Email address" and the staff member changes the email to a valid value and selects Save changes **Then** the system shall show "Profile updated" and "Your changes have been saved." with the new name and email and a "Back to Settings" button (S03, S04) **When** the email is typed without "@" **Then** the system shall show "Enter a valid email address." and stay in the editor (S05) **When** Back or Cancel is selected after changes **Then** the system shall ask "Leave without saving your changes?" with "Discard changes" and "Keep editing" (S10) **Sample Data:** Full name: Dietitian Account. Email: admin.updated@filfoods.ph (example).	3. The system shall not change the role through Edit Profile.

DIT - 07	Settings & Profile	As a Dietitian	set notifications, language and appearance	so that the app suits how I work.	Given When Then	1. The system shall apply a preference only after Apply (language, appearance) or at the switch (notifications).
					A. Notifications switch **Given** Settings is open with Notifications ON **When** the switch is turned OFF **Then** the preference shall be saved and the row shall show OFF (S07) **When** it is turned ON **Then** the row shall show ON (S06)	2. The system shall keep each preference per account.

					B. Language **Given** Settings is open **When** Language is selected **Then** the system shall show a choice screen with "English" and "Filipino", and "Apply" / "Cancel"; Apply with Filipino shall show the Settings labels in Filipino (S08, S16); Cancel keeps the prior language	
					C. Appearance **Given** Settings is open **When** Appearance is selected **Then** the system shall show "Light Mode", "Dark Mode" and "Use device setting" with Apply / Cancel; Dark + Apply applies the dark theme (S09, S11); device setting shows "Current device theme: Light" (S17)

DIT - 17	Health Information Approval	As a Dietitian	review a request to remove a customer's health condition and approve or reject it	so that a condition is taken off a meal recipient's profile, and the kitchen stops preparing meals for it, only after a qualified person has confirmed that it is safe.	Given When Then	1. The system shall list pending removal requests on the Dietitian Dashboard (a "Condition Removal Requests" card with the pending count) and in the bell notifications, oldest first, showing the meal recipient, the condition, the reason, who asked and when. The list shall stay available when the Notifications switch (DIT - 07) is OFF.

A. Review pending requests **Given** a user has asked to remove Diabetes from Lia Dizon's health conditions **When** the Dietitian opens "Condition Removal Requests" from the Dashboard **Then** the system shall list "Lia Dizon · Diabetes", the reason and the date requested, and open the request with Lia Dizon's other conditions, allergies and nutritional preferences **Sample Data:** Requested by Carlos Dizon on 2026-11-07. Reason: Doctor's note says blood sugar is back to normal.	2. The system shall show, on each request, the meal recipient's other health conditions, allergies and nutritional preferences (DIT - 11, DIT - 12, DIT - 13) so that the Dietitian can decide.
B. Approve **Given** the request for Diabetes is open **When** the Dietitian selects Approve **Then** the system shall remove Diabetes from Lia Dizon's profile, update the "last updated" date and notify Carlos Dizon "Your request to remove Diabetes from Lia Dizon's health conditions was approved." **Sample Data:** Approved on 2026-11-08.	3. The system shall, when the Dietitian approves a request, remove the condition from the meal recipient's profile, update the "last updated" date and notify the user (USR - 09).
C. Reject with a reason **Given** the request for Diabetes is open **When** the Dietitian selects Reject, enters a reason and confirms **Then** the system shall keep Diabetes and notify Carlos Dizon "Your request to remove Diabetes from Lia Dizon's health conditions was not approved." with the reason **When** the reason is blank **Then** the system shall display "Please enter a reason for rejecting this request." and not reject the request **Sample Data:** Reason: Please send a recent doctor's note.	4. The system shall require a reason when the Dietitian rejects a request and display "Please enter a reason for rejecting this request." when it is blank. On rejection the condition shall stay and the user shall be notified with the reason.

					D. Already decided **Given** two Dietitians have the same request open **When** the second Dietitian decides after the first **Then** the system shall display "This request has already been decided." and change nothing	5. The system shall let only one decision be made per request and display "This request has already been decided." if another Dietitian decided it first.
					E. Other roles blocked **Given** the Admin, Kitchen Staff or Delivery Staff is signed in **When** the person opens a removal request by direct link or tries to approve or reject it **Then** the system shall refuse and display "You do not have access to this page."	6. The server shall allow only the Dietitian role to decide a request. The user who made the request, the Admin, Kitchen Staff and Delivery Staff shall be refused, and a direct link shall return "You do not have access to this page." (DIT - 16).
						7. The system shall record every decision in the audit log (ADM - 20) with the Dietitian account, meal recipient, condition, decision, reason and time, and in the meal recipient's change history (USR - 38).
